Student Affairs Work, 2001 George D. Kuh, Elizabeth J. Whitt, Jill D. Shedd, 1987 This monograph uses illustrations from the student affairs field and

other disciplines to describe for student affairs staff some of the profound changes underway in the field. It focuses on four core elements in the field of student personnel services: 1. delivery of services to students, 2. student development programming, 3. administration, research, evaluation, and policy, and 4. preparation of student affairs staff. Chapter 1 defines the concept of paradigm and describes the changing nature of the world in which student affairs staff live and work. Chapter 2 describes a conceptual framework and uses that framework to identify patterns of change that distinguish the emergent paradigm from a more conventional paradigm. Chapter 3 tests several core assumptions of student affairs work against characteristics of the emergent paradigm. Some implications of the emergent paradigm for using human development theory and the student development concept in student affairs work are presented in chapter 4. In chapter 5, the conventional paradigm's emphasis on reason and logic is juxtaposed against intuition and action learning. In chapter 6, the potential for naturalistic inquiry to enrich student affairs research and writing is discussed. The final chapter offers recommendations for how faculty and others can incorporate emergent paradigm assumptions in curriculum and other aspects of graduate study. References are included, a glossary, and an annotated bibliography are appended.

Enhancing the Multicultural Campus Environment: A Cultural Brokering Approach Frances K. Stage, Kathleen Manning, 1992 The general college student body has evolved from a homogenous, predominantly white population to one that is culturally, racially, and ethnically diverse. The findings of current research on achievement and retention of minority students are discouraging. Fewer minorities attend college; success rates of those in college have not improved, and dreams of achieving educational equity remain unfulfilled. This volume of *New Directions for Student Services* moves forward from a descriptive perspective of what is happening on college campuses. It describes an approach to working with students that involves cultural brokering, which enjoins us to learn to think contextually, span boundaries, ensure optimum performance, and take action. The cultural broker model is suggested for use with all students on today's campuses. The model presents a vision of practice that can respond to the diversity of the 1990s and beyond. This reflexive approach is defined as deliberate and thoughtful choices of action based on knowledge of cultural differences, expansion of personal experience to others, communities, education from a variety of perspectives, and advocacy for broadening opportunities. For college administrators and student affairs professionals, the perspectives and suggestions within this volume provide valuable
