want to live in Logging on to Facebook that first day in retrospect was the second and to date the last time that any technology has captured my imagination The first was when Apple advertised the first laptop the PowerBook in the 1990s with the words What s on your PowerBook World domination my teenaged self answered instinctively That s what these devices were made for I thought so small and yet so powerful so capable of linking quickly to and between everything else in the world From the laptop I could write and distribute information faster than ever before It was intoxicating to imagine and Facebook s sudden faithful rendering in 2004 of the physical world into the virtual felt the same What could you do now that you could see and connect to everyone and everything instantly But what also could be diminished by such quick access In the realm of ideas it seemed easy Who wouldn t want to distribute and discuss ideas widely However in the realm of the personal it seemed more complicated What was the benefit of doing everything in public Is information itself neutral or do different types of information have different values different levels of expectation of privacy different implications for distribution and consumption Should all information be shared equally quickly and without regard to my relationship to it And finally and most important as we ask whenever we begin a new relationship with anything would this be good for me
