

**NFL Schedule Progress**

# A Typical Year in the NFL

The National Football League, commonly known as the NFL, is the United States' top level American football competition. The league has thirty-two teams and its schedule makes time to fit two hundred and seventy-two games into every regular season. Some of these matchups are also seen played in other parts of the world, such as Mexico, the United Kingdom, Germany and South America. In order to keep the league running smoothly, games and events take place throughout the year.

## The Regular Season

Every year, a new season begins in September and runs for 18 weeks.

Planning for the next month's action information is collected by schedule makers as early as the spring to help work out matchup dates and features.

## On The Road?

Thousands of computers are used to create different matchup schedules before one is settled that works for every team.

Throughout the regular season, each team will play seventeen games, most of these take place at home (offenses may hit, but will have one "bye week" when they don't play a game) scattered in their schedule as players can rest and coaches can reuse tactics.

## The Postseason

In January, the regular season reaches its end and is followed by the postseason, when the best teams take part in playoffs and championship games. However, the league's highlight and its final game is Super Bowl, which usually takes place in February.
