Human vs ChatGPT - Language of Advertising in Beauty Products Advertisements Ida Skubis, Dominika Kołodziejczyk, 2024-11-21 This book systematically investigates the linguistic strategies employed in beauty product advertising to assess their persuasive and manipulative effects. The work is divided into two sections: a review of relevant literature and an empirical analysis of advertisements. The analysis initially focuses on the linguistic features of advertisements created by humans prior to the introduction of ChatGPT, examining the linguistic measures used and their methods of persuasion and manipulation. Subsequent sections provide a detailed examination of advertisements generated by ChatGPT versions 3.5 and 4.0, analysing the artificial intelligence's use of linguistic techniques. This includes a meta-analysis where ChatGPT itself discusses the linguistic strategies it employs. The ultimate goal is to compare and contrast the effectiveness and linguistic devices used in advertisements crafted by humans and those by ChatGPT, analysing how AI influences the language of advertising and its impact on consumer behaviour. *Life Hack Essentials* Xena Mindhurst, AI, 2025-01-27 *Life Hack Essentials: Small Shifts for Big Impact* redefines productivity by demonstrating how science-backed micro adjustments can create lasting change without overwhelming effort. Centered on habit formation, time optimization, and decision fatigue mitigation, the book bridges behavioral psychology with practical daily strategies. Its core insight: Sustainable self-improvement stems from aligning routines with how our brains naturally work, like using the 20/20 Second Rule to reduce barriers to positive habits or applying cognitive stacking to group tasks by mental demand. Unlike rigid productivity guides, this book emphasizes flexibility through concepts like the 5% Principle, where small consistent tweaks compound over time. Chapters blend research, such as the Pareto Principle's role in prioritizing high-impact tasks, with tools like Micro Action Plans to redesign environments or create decision menus that conserve mental energy. The structure progresses from debunking willpower myths to building personalized systems integrating neuroscience, habit loops, and organizational theory. Agile workflows are made accessible through advice. What sets *Life Hack Essentials* apart is its rejection of one-size-fits-all solutions. Instead, it offers adaptable frameworks for diverse lifestyles, using relatable anecdotes and visual summaries. By focusing on environmental redesign over sheer discipline, it empowers readers to transform effectiveness into a dynamic process, not a grind, making it ideal for anyone seeking evidence-based strategies to align daily choices with long-term goals.
