Trust in the Age of AI George C. Somers, 2025-11-07. Trust in the Age of AI: Lessons from OpenAI's Crisis explores one of the most shocking and revealing moments in modern tech: OpenAI's AI company crisis that rocked the industry. In this gripping account, George C. Somers takes readers behind the scenes of the OpenAI infrastructure risk and the fallout from one simple but explosive comment that raised eyebrows worldwide. In a world where artificial intelligence trust is increasingly being tested, this book uncovers the urgent need for transparency in big tech, the rising responsibility of AI infrastructure investment, and the delicate balance between private and public sector technology relationships. With AI companies growing at an exponential rate, corporate accountability in tech has never been more important. OpenAI, the company behind ChatGPT and a leader in AI infrastructure, faced a firestorm when its CFO suggested that the U.S. government should offer government support for AI infrastructure. This comment unleashed questions about taxpayer risk in tech investments, corporate responsibility, and the potential for government guarantees and tech. Was OpenAI a private company valued at over 500 billion seeking to shift its financial burdens to taxpayers? Through the lens of this crisis, Trust in the Age of AI dives into the ethics of AI infrastructure and asks tough questions: Should AI startups be

allowed to fail or should they be protected from market risks What does it mean for large tech companies when they fail to manage their own debt and infrastructure growth Building trust in AI companies has never been more crucial as the world watches how they balance ambition with accountability With the AI arms race business intensifying the future of the artificial intelligence business is in a fragile state As OpenAI recovers from its missteps this book gives readers a roadmap to understanding the future of AI how big tech builds AI and why AI business model risks are just the beginning of a larger conversation about innovation sustainability and trust
