Question
10/10/20 3:54 PM PD

Hi, I'm Preceptor Diane. I will explain the details of this assignment and your objectives, just as a preceptor would in real life. **Pay close attention to this information as it will help guide your exam.** At the end of this precept, you will answer a short question about the upcoming assignment. During the simulation, you may return to these instructions at any time by scrolling to the top of your transcript.

What are my objectives in this assessment?

Question
10/10/20 3:55 PM PD

In your interview with Brian, you will **ask about the history of his presenting illness and the functioning of relevant systems** in order to obtain subjective data related to his chest pain. If you discover any disease states, **ask about symptoms and the patient's experiences of them.** Your questioning should cover a broad array of the symptom's characteristics. You will also **inquire into the health history of Mr. Foster's family** so you can determine his genetic disposition to any diseases. In addition to collecting subjective data, you will **perform a physical exam on Mr. Foster** to gather objective data about his health and physiology. Throughout the conversation, you should **educate and empathize with Mr. Foster** when appropriate to increase his health literacy and sense of well-being. While you should **communicate with patients using accessible, everyday language**, it is standard practice to use professional medical terminology everywhere else, such as in **documenting physical findings and nursing notes.** You may complete the exam activities in any order and move between them as needed.

What else will this exam involve?

Question
10/10/20 3:55 PM PD

You will complete nursing tasks to **protect the patient's safety, privacy, and health.** You can **document your findings, including vital signs,** in the Electronic Health Record. This record provides necessary information for healthcare professionals who will continue patient care. You will then move onto the Care Plan activity, in which you will **synthesize your subjective and objective data to complete the nursing process.** You will **develop a nursing diagnosis** for Mr. Foster's condition, **identify a treatment goal, plan your interventions and evaluations,** and finally **assess if your goal was achieved.** The Care Plan is just as important as your assessment, and the patient's well-being will be greatly affected by your diagnosis and interventions.

What is the situation?
