Spotify Guide:

Spotify Teardown Maria Eriksson,Rasmus Fleischer,Anna Johansson,Pelle Snickars,Patrick Vonderau,2019-02-12 An innovative investigation of the inner workings of Spotify that traces the transformation of audio files into streamed experience Spotify provides a streaming service that has been welcomed as disrupting the world of music Yet such disruption always comes at a price Spotify Teardown contests the tired claim that digital culture thrives on disruption Borrowing the notion of teardown from reverse engineering processes in this book a team of five researchers have playfully disassembled Spotify s product and the way it is commonly understood Spotify has been hailed as the solution to illicit downloading but it began as a partly illicit enterprise that grew out of the Swedish file sharing community Spotify was originally praised as an innovative digital platform but increasingly resembles a media company in need of regulation raising questions about the ways in which such cultural content as songs books and films are now typically made available online Spotify Teardown combines interviews participant observations and other analyses of Spotify s front end with experimental covert investigations of its back end The authors engaged in a series of interventions which include establishing a record label for research purposes intercepting network traffic with packet sniffers and web scraping corporate materials The authors innovative digital methods earned them a stern letter from Spotify accusing them of violating its terms of use the company later threatened their research funding Thus the book itself became an intervention into the ethics and legal frameworks of corporate behavior

look into language use in German language rap First it examines how the use of English loanwords has changed from 1990 to 2020 in rap made in Germany This is done by observing and analysing language use of fifteen rappers rap groups throughout the course of their discographies Normative use of English loanwords has been observed in the corpus The analysis of rap made in Germany is followed by a smaller sample analysis of rappers from Austria and Switzerland The analysed timeframe was the same as for Germany so that normative loanword use by specific rappers can be observed and compared with the results based on German rappers language use Finally results from all three countries are compared with the existing studies of English loanword use in different media and the research with which they share sociolinguistic variables **Google**
