Abu Dhabi 2016 Blue Economy Declaration:

Blue Economy of the Indian Ocean Ranadhir Mukhopadhyay, Victor J. Loveson, Sridhar D. Iyer, P.K. Sudarsan, 2020-11-03

The economic paradigms currently dominating the world are not sustainable. The threats from climate change, exploitation based approaches to commerce, and the excess acquisition of resources loom large, as well as the possibility of military flare-ups. Maintaining a balance between development and ecosystems, aspirations for growth, and the need for sustainability is a prescient challenge. The Indian Ocean Region (IOR) encompasses some of the poorest countries in the world and those that will bear the brunt of the negative impacts from climate change. This book explores the immense potential of the IOR and how best to maintain sustainable and responsible economic and strategic activities. The combination of science innovation and entrepreneurship will create a new blue economy business model which has the potential to transform society. Based on critical analysis of the model and its practical applications, including risks as well as opportunities, the topics discussed range from food security, energy, and resilience to climate change, trade, and investments, and improved maritime connectivity to tourism, poverty alleviation, and socioeconomic growth, encompassing a wide range of interests and expertise.

FEATURES

Examines the geo-politics, geo-resources, and geo-hazards of the IOR and identifies opportunities and methods to achieve success. Covers a detailed assessment of available resources: fisheries, minerals, energy, threats such as pollution, plastic, acoustic, carbon, bio-invasion, geo-politics, maritime security, military invasion, and strategic vision, determining carrying capacity, ethical governance, and responsible ecosystem of the Indian Ocean. Analyzes the economics of the blue economy, the global scenario including the Pacific and Caribbean islands, and the aspect of the Chinese geo-political invasion in the Indian Ocean. Inspires entrepreneurs to adopt new ways of creating economic benefits, reducing energy use, and increasing revenue while simultaneously helping the communities involved. Discusses the threat and security perspectives of the IOR and the collective responsibility for a sustainable use of resources. Crossing a wide range of interests and expertise, this book explores topics and ideas that will be essential to researchers and professionals in marine sciences, economics, business, geography, and political sciences. Graduate students in the same fields, as well as any and all organizations that maintain a presence in the IOR, will likewise find this book to be a valuable resource.

Blue Economy and Ocean Sustainable Development in a Globalised World: Social, Political, Economic and Environmental Issues Ibukun J. Adewumi, Andrei Polejack, Joanna Vince, Maree E. Fudge, 2023-12-05

In the last decade, the concept of a Blue Economy has ignited a deep theoretical debate. Ranging from the integration of the triple bottom line of sustainability to the optimization of profit from ocean exploitation, the meaning of the term blue economy differs considerably between epistemic communities and even more so among national and regional policies. There is a general sense of the opportunity to realise enhanced social and economic benefits from the sustainable utilisation of their ocean and coastal resources under the umbrella framework of blue economy. Blue economy is gaining traction already as a significant component of national policies, even in spite of a clear conceptualization.

of the term Many countries are now preparing national policies towards realising their blue economy ambitions utilizing the concept as they see fit Likewise multilateral and regional organisations are developing guidelines and providing investment in new research technologies and financing tools that promote blue economy Critical challenges abound in particular in less privileged countries These include the gap in research capabilities governments prioritizing social wellbeing and economic profit in contrast to environmental protection the identification of new and emerging areas of ocean economic activity that are both socially and ecologically sustainable and holds viable business models that can attract private investment

Illusions of Location Theory: Consequences for Blue Economy in Africa Francis Onditi, Douglas Yates, 2021-01-05 Illusions of Location Theory Consequences for Blue Economy in Africa questions the relevance of location theory in explaining the coastal hinterland continuum and the implications for the utilization of blue economy ecosystem in such a contested space in Africa It pays more attention to territorial contestations maritime disputes vulnerabilities of landlocked states and expansionist policies as displayed through spatial organizational regimes These areas of investigation have previously been largely studied from the narrow perspective of location unduly focusing on comparative advantages of distance while neglecting the influence of forces such as technology ideology and the power of mental mapping in spatial decision making This volume puts forward the argument that the harmonious relationship between states and efficient exploitation of the blue economy ecosystem in ways that promote peace between states lies not only in the structural transformation of markets but also in bridging the spatial and social divide between the coastal and hinterland societies Thus this work proffers possibilities for a holistic regime for managing Africa s coastal hinterland continuum through innovative strategies such as SMART blue economies and the infusion of the geopolitical dimension into the management of maritime and territorial diplomacy The combination of theoretical and empirical analysis buttressed by in depth case studies of what works in the management of blue economy ecosystem and what does not work make this volume ideal for researchers students and practitioners interested in African regional studies African political economy political geography strategic military studies governance of seas and oceans and maritime science diplomacy *Global Blue Economy* Md. Nazrul Islam, Steven M. Bartell, 2022-11-28 A global blue economy is an economic arena that depends on the benefits and values realized from the coastal and marine environments This book explains the sustainable blue economy as a marine based economy that provides social and economic benefits for current and future generations It restores protects and maintains the diversity productivity and resilience of marine ecosystems and is based on clean technologies renewable energy and circular material flows India-Africa Relations Rajiv Bhatia, 2021-11-14 This book explores the emergence and assertion of Africa as a significant actor and stakeholder in global affairs and the transformation of the India Africa relationship Beginning from this strategic perspective the book presents an in depth exploration of India Africa partnership in all its critical dimensions It delineates the historical backdrop and shared colonial past to focus on and contextualise the evolution of the India Africa engagement in the first two

decades of the 21st century The book scrutinises the unfolding international competition in Africa in depth which includes global actors such as the EU US and Japan among others focusing especially on China s growing influence in the region Further it dissects objectively the continental regional and bilateral facets of India Africa relations and offers a roadmap to strengthen and deepen the relationship in the coming decade This volume will be very useful for students and researchers working in the field of international relations foreign policy governance geopolitics and diplomacy

Abu Dhabi's Vision 2030: An Ongoing Journey Of Economic Development Linda Low,2012-05-21 This book aims to tell the Abu Dhabi story in economic development from its past dominance in oil to its economic vision for the future More than being an exemplar of industrial restructuring and diversification from a resource based to a 21st century knowledge based economy and society Abu Dhabi emphasises its cultural legacy and tradition as an environmental advocate for green and sustainable pathways It has as many challenges as creative responses to show that its success is not by wealth alone This case study unveils Abu Dhabi in particular and the rest of Arabic and GCC economic development in general They have all attracted foreign investment and global business typically as hydrocarbon rich resource economies Beyond that the geoeconomics and geopolitics of the Middle East and North Africa with or without the Arab Spring in 2011 is in and of itself a rich region for multidisciplinary studies and research not just for economics and business With Qatar Abu Dhabi boasts of one of the highest per capita income in the world therein lies a reason to enquire about its success and pivotal role in the GCC and global contexts

The Report: Abu Dhabi 2016 Oxford Business Group,2016-05-09 Subdued oil prices prompted a trimmed federal budget for 2016 as the UAE like other countries in the region tightened its belt in response to falling hydrocarbons revenues However a sustained focus on economic diversification and targeted investment in Abu Dhabi s key non oil sectors in recent years means the emirate is well positioned to weather the storm Looking forward plans for future development are mapped out in Abu Dhabi Economic Vision 2030 a comprehensive economic policy document that aims to reduce dependence on oil and gas thereby creating a more sustainable knowledge based economy for the emirate and its inhabitants Aided by hydrocarbons reserves that are among the world s largest and substantial financial resources Abu Dhabi has built up a strong foundation to become a regional leader and an increasingly important global player in a wide variety of sectors including oil and gas financial services health care aviation and renewable energy
