Information Theory Robert B. Ash, 2012-06-14 DIV Analysis of channel models and proof of coding theorems study of specific coding systems and study of statistical properties of information sources Sixty problems with solutions Advanced undergraduate to graduate level div Elements of Point Set Topology John D. Baum, 1991-01-01 Topology continues to be a topic of prime importance in contemporary mathematics but until the publication of this book there were few if any introductions to topology for undergraduates This book remedied that need by offering a carefully thought out graduated approach to point set topology at the undergraduate level To make the book as accessible as possible the author approaches topology from a geometric and axiomatic standpoint geometric because most students come to the subject with a good deal of geometry behind them enabling them to use their geometric intuition axiomatic because it parallels the student's

experience with modern algebra and keeps the book in harmony with current trends in mathematics After a discussion of such preliminary topics as the algebra of sets Euler Venn diagrams and infinite sets the author takes up basic definitions and theorems regarding topological spaces Chapter 1 The second chapter deals with continuous functions mappings and homeomorphisms followed by two chapters on special types of topological spaces varieties of compactness and varieties of connectedness Chapter 5 covers metric spaces Since basic point set topology serves as a foundation not only for functional analysis but also for more advanced work in point set topology and algebraic topology the author has included topics aimed at students with interests other than analysis Moreover Dr Baum has supplied quite detailed proofs in the beginning to help students approaching this type of axiomatic mathematics for the first time Similarly in the first part of the book problems are elementary but they become progressively more difficult toward the end of the book References have been supplied to suggest further reading to the interested student
