Understanding of welfare states has been much enriched by comparative work on welfare regimes and gender. This book uses these debates to illuminate the changing gender regimes in countries of Central and Eastern Europe. It has particular significance as countries in the region make the transition from communism and into a European Union that has issues of women's employment, work-life balance and gender equality at the heart of its social policy. The analysis draws on quantitative comparative data and on rich qualitative data from a new study of mothers in Polish households, illuminating the effects of changing welfare and gender relations from the perspective of those most directly affected: mothers of young children. This book is an important addition to the literature and is recommended to academics and students interested in the study of gender relations, welfare states and international and comparative European social policy. The insights gained will also be of value to those engaged in welfare policy and practice.

Methodology For Land And Housing Market Analysis Gareth Jones, Peter M.

Ward, 2003-12-08 The aim of this book is to bring methods of land market and land price analysis to the foreground. It relates substantive research findings for land and urban development and blends these with a focus on research design and methodology. Its findings have relevance beyond the topics of housing and land; it broaches the whole question of how research design and general approach may lead to fundamentally different findings, different priorities and different policy prescriptions and preoccupations. It is based on work done in the Third World but is also relevant to studies of the industrialized world.
