computation can lead to efficiency improvements in parallel processing establishing the connection between emergent computation and nonlinear systems and comparing two search techniques to show how the emergent computational approach to a problem differs from other more conventional approaches Stephanie Forrest is Assistant Professor in the Department of Computer Science at the University of New Mexico She is also affiliated with the Center for Nonlinear Studies and Computing Division at Los Alamos National Laboratory Biology of the vertebrates; a comparative study of man and his animal alli Herbert Eugene Walter,1928 **Computer & Control Abstracts** ,1996 *Current Index to Statistics, Applications, Methods and Theory* ,1994 The Current Index to Statistics CIS is a bibliographic index of publications in statistics probability and related fields *Biology of the Vertebrates* Herbert Eugene Walter,1928 Government Reports Announcements & Index ,1996 Solar Active Regions Frank Quimby Orrall,1981 **International Aerospace Abstracts** ,1998 *Physics Briefs* ,1994 Advances in Artificial Life ,2005 *Antarctic Bibliography* ,1984 **Guest** Christopher Bucklow,2004 Known for his silhouettes made using pinhole cameras Christopher Bucklow s first monograph Guest collects for the first time many works from the Guest and Tetrarchs series The book also documents his earlier photographic work and video images made within the Canopic Fusion Reactor a pinhole camera the size of a building These guests are spooks for our time a New Age vision of the body as energy that is also a spectre of nuclear fusion Kenneth Baker San Francisco Chronicle **Abstracts of the Journal** Institute of Petroleum (Great Britain),1947 **Journal** Institute of Petroleum (Great Britain),1947 Vols 7 include Abstracts which beginning with v 9 form a separately paged section and from v 17 on have separate title pages **Journal of the Institute of Petroleum** ,1947 Mathematical Reviews ,2005 *Dissertation Abstracts International* ,2003
