Creating America Chapter 13:

Building America's Health United States. President's Commission on the Health Needs of the Nation,1952

Creating America's Future James T. Ziegenfuss,2008-08-07 American citizens assume that the future for this country will be a future much like the past beautiful in many respects This optimistic view is now countered by those who see a country in decay struggling to address problems in health care education the environment international affairs and other sectors This book calls on citizens and their leaders to build the future they most desire The future should not happen to citizens but instead be created by citizens In part one this book examines the reasons for future building and the processes for doing so through interactive public sector private sector dialogue and by applying methods of continuous improvement reengineering and visioning In part two Ziegenfuss presents scenarios of America s future that include the country s points of decay trends vision and strategies in each of the parts of America meaning energy health care transportation business housing and urban development education arts and entertainment science environment agriculture international affairs and defense and law and justice Public and private citizens especially students teachers and planners are encouraged to lead the debates with hope and vision defining the future they most desire *The Forty Years that Created America* Edward M. Lamont,2014-10-03 The names Jamestown and Plymouth have become synonymous for most students of American history with founding and birth both of the American nation and of freedom and democracy themselves In this book author Ted Lamont asks us to reconsider our country s formative years and explore the stories lives achievements and failures of America s earliest founding fathers those who paved the way for the Colonial Era and the American Revolution They were explorers investors passionate religious leaders and determined developers who struggled for generations to successfully plant the English flag in this strange new soil Lamont deftly details the ways in which the stories and struggles of figures like Sir Walter Raleigh Bartholomew Gosnold Richard Hakluyt Sir Ferdinando Gorges and Captain John Smith were not just related but connected in ways that help us better understand the colonies and culture born of their efforts The infancy of America from Roanoke s founding in 1585 through the firm establishment of Jamestown and Plymouth in 1625 is where we first see planted the seeds of the rest of America s colonial economic political and cultural history that was the immensely difficult and often overlooked first step toward the New World we are still working to perfect **Building America's**

radio and television challenged the hegemony of the printed word the Saturday Evening Post was the preeminent vehicle of mass culture in the United States And to the extent that a mass medium can be the expression of a single individual this magazine with a peak circulation of almost three million copies a week was the expression of its editor George Horace Lorimer Cohn shows how Lorimer made the Post into a uniquely powerful magazine that both celebrated and helped form the

Wickware,1915 *The Changing American Countryside* Emery N. Castle,1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the

economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life
