Rethinking Clusters Silvia Rita Sedita, Silvia Blasi, 2021-05-22 This volume discusses how different geographical spaces can enhance or hinder the capacity of a variety of organizational settings to achieve economic value creation in the pursuit of sustainable regional development In order to provide the most comprehensive picture of new sources of value creation for sustainable transitions the book collects contributions that tackle this issue from a variety of perspectives and adopts a systemic approach where macro meso and micro levels of analysis are intertwined in three sections This multidisciplinary and interdisciplinary approach comes from scholars operating in the fields of planning economic geography social entrepreneurship and organizational management The first section of the book adopts a macro level approach linking sustainability to the regional development theme and addresses how organizations work between different social interests to produce outcomes not previously realized The second section of the book focuses on the spatial dimensions of sustainable development with particular clusters industrial districts and regions considered as relevant units of analysis meso level analysis The third section of the book is dedicated to a micro level approach illustrating how to drive social entrepreneurship activities which are based upon sustainable business models centered in the creation of a shared value The book is geared towards scholars working on sustainable development issues intersecting the disciplines of regional studies economic geography and management and will appeal to geographers and researchers in economic development business innovation and sustainability transitions CSR 2.0 and the New Era of Corporate Citizenship Camilleri, Mark Anthony, 2016-12-21

Responsible behaviors in the realm of business continue to remain a crucial component of organizational development. By exploring core aspects of contemporary corporate strategies, businesses can create more value in social welfare initiatives. CSR 2.0 and the New Era of Corporate Citizenship is an authoritative reference source for the latest scholarly research on the ways in which corporate entities can implement responsible strategies and create synergistic value for both businesses and society. Featuring extensive coverage across a range of relevant perspectives and topics such as corporate citizenship, stakeholder engagement, and business ethics, this publication is ideally designed for students, academics, and researchers seeking current, concise, and authoritative research on the business case for corporate social responsibility.

Global Business Ethics Abraham Stefanidis, Linda M. Sama, 2024-11-08. Drawing on contributions from nineteen prominent scholars, the book reflects on the quest for sustainable development as a source of competitive advantage for organizations and as a global imperative for society. It highlights how organizations' decision-making processes and bundled capabilities can promote innovative approaches to address current ethical dilemmas, setting forth business ethics, corporate social responsibility, and sustainability as required tenets for participating in a global economy. As societal and business stakeholders race toward the 2030 deadline to meet the United Nations' 17 Sustainable Development Goals, business plays a critical role in achieving global goals. It is thus increasingly crucial that organizational practices and policies incorporate a socially responsible agenda based on ethical decision-making to achieve a more just society. Incorporating people, technology, the natural environment, and economics in a way that is inclusive, honest, just, and sustainable becomes a management imperative challenge. Given the rapid pace of changes taking place in the global economy, the time for action is now if we are to preserve our planet and ensure progress and prosperity. This book will appeal to scholars in business ethics, management, international business, and sustainability, as well as to business executives. The chapters in this book were originally published in *International Studies of Management Organization: Corporate Social Responsibility*.

Corporate Social Responsibility Brent D. Beal, 2013-07-05. This unique supplemental text offers a well-structured and thorough introduction to corporate social responsibility (CSR). Author Brent D. Beal introduces the basic concept of CSR, briefly discusses the challenges of defining it, and summarizes important conceptual models. CSR is examined in the context of the perfect competition market model, market failure, and social dilemmas. Three different types of CSR—systemic, strategic, and philanthropic—are highlighted. Finally, arguments both for and against CSR are outlined, and several conceptual frames are proposed. Readers are encouraged to think about what businesses should be responsible for in society and how a society's economic system should be structured, bounded, and ultimately controlled. This text is appropriate for any business course in which the introduction of CSR would complement other course content.
