School Management System Project Documentation

School Management System Project Proposal

Problem Statement:

There is a problem with traditional school management because it didn't have a systematic way to store information about students. When the staff or administrator wants to record the data of a student, they have to fill out a paper form. The data might be lost if there are a lot of problems at the same time. Another problem that can happen is that it can be hard to find and update information about students and class arrangements. Teachers have the same problems as administrators when they use a manual system, like not being able to keep track of students' behavior, results, attendance, and so on, which aren't kept in a systematic way so that all of the data can be used in the future and improved upon. Below is a specific problem statement that happens in a standard school when they use a manual system.

- There is a lot of paper used to keep track of student information, their results, and their performance.
- Manual systems are difficult to locate and update with information about students, their grades, and how well they performed in class.
- The manual system doesn't protect the academic information that could be lost if it were lost.
- There are some things that the school doesn't tell parents or teachers about, so they don't know about them.

Solution:

Data security and management are very important parts of the school management system. This makes sure that every student in the school is kept up to date. Educators' and students' names, parents' names, transaction history, and other achievements are all stored. Monitoring and keeping track of notes, remarks, incidents, and other actions such as internal documents and workflows are included in the system. It is individuals who make and manage timetables. Keeping track of exams, assessments, grades, and progress in school is all managed by the software.

Project Scope:

This system is designed to be easy for people to use and efficient for a wide range of different tasks. These tasks may include things like registering new students, managing fees, managing exams, and all the other things that make the administrative department of a school work well.
