Russia holds more Arctic territory than any other state yet unlike other Arctic states it does not have a unified strategy identifying economic and political aims for the North Russia s policies on the North are dispersed across a variety of fields from domestic migration politics to oil and gas development This volume engages the disparate elements of Russian northern policy and illustrates how the centralized relatively economically strong and politically assertive Russia of today defines and addresses northern spaces opportunities and challenges As energy markets continue looking northward and climate change renders the Arctic increasingly accessible the geopolitical interests of Arctic states will be brought more frequently to the forefront These circumstances will make the disputed borders and overlapping sovereignty claims of the North an important topic in international politics Given its geographic size and political influence
