Hitherto there has been no book that attempted to sum up the breadth of Umberto Eco's work and its importance for the study of semiotics, communication and cognition. There have been anthologies and overviews of Eco's work within Eco Studies, sometimes works in semiotics have used aspects of Eco's work. Yet thus far there has been no overview of the work of Eco in the breadth of semiotics. This volume is a contribution to both semiotics and Eco studies. The 40 scholars who participate in the volume come from a variety of disciplines but have all chosen to work with a favorite quotation from Eco that they find particularly illustrative of the issues that his work raises. Some of the scholars have worked exegetically, placing the quotation within a tradition; others have determined the epistemic value of the quotation and offered a critique; while still others have seen the quotation as a starting point for conceptual developments within a field of application. However, each article within this volume points toward the relevance of Eco for contemporary studies concerning semiotics, communication and cognition.

Mapping the World Anti Randviir, 2004 **Journal of Humanities**, 2002 VS Umberto Eco, 1999 Images Sunil Manghani, 2013. *Images: Critical and Primary Sources* is a major multi-volume work of reference that brings together seminal writings on the image. Taking an interdisciplinary approach, the essays range across the domains of philosophy, history, art, aesthetics, literature, science, anthropology, critical theory and cultural studies. The essays reveal a wide set of perspectives, problematics and approaches, helping to frame a rich, encompassing view of what we can broadly term image studies. The four volumes are arranged thematically, each separately introduced and with the essays structured into specific sections for easy reference. Volume 1, *Understanding Images*, establishes conceptual, historical, ideological and philosophical framings for understanding and defining the image, followed in Volume 2, *The Pictorial Turn*, with a focus on the most enduring and constitutive question of the image: its relationship to, with and against, text and textuality. Volume 3, *Image Theory*, offers representative materials covering key theoretical approaches for analyzing, interpreting and critiquing the image. Finally, Volume 4, *Image Cultures*, examines a wide range of social and cultural contexts of the image, which covers aspects of visual evidence, image and memory, visual methodologies, scientific imaging and the practical engagement of image makers. *Images: Critical and Primary Sources* offers a major scholarly resource for any researchers involved in the study of the image and visual culture.
