M-libraries Mohamed Ally, Gill Needham, 2008 Mobile Phone Ownership is considerably more ubiquitous than internet access via personal computers; more and more people around the world are carrying a tiny mobile device of some kind in their pocket or handbag. The environment in which people find and use information is changing: we are busier, we are constantly on the move, and whether we are shopping, booking a holiday, or looking for train times, we expect instant results. What does all this mean for libraries? The development of networked technologies opened up huge opportunities for libraries to make their resources and services accessible to their users regardless of distance. The opportunity to deliver these to users via their mobile phones, PDAs, and other handheld devices will be as significant a challenge. Indeed, if libraries choose to ignore this challenge, they are in danger of being left behind in an increasingly
