Innovation Through Information Systems Frederik Ahlemann, Reinhard Schütte, Stefan Stieglitz, 2021-10-28 This book presents the current state of research in information systems and digital transformation Due to the global trend of digitalization and the impact of the Covid 19 pandemic the need for innovative high quality research on information systems is higher than ever In this context the book covers a wide range of topics such as digital innovation business analytics artificial intelligence and IT strategy which affect companies individuals and societies This volume gathers the revised and peer reviewed papers on the topic Management presented at the International Conference on Information Systems held at the University of Duisburg Essen in 2021

Intelligent Decision Support Systems Miquel Sànchez-Marrè, 2022-03-28 This book with invaluable contributions of Professor Franz Wotawa in chapters 5 and 7 presents the potential use and implementation of intelligent techniques in decision making processes involved in organizations and companies It provides a thorough analysis of decisions reviewing the classical decision theory and describing usual methods for modeling the decision process It describes the chronological evolution of Decision Support Systems DSS from early Management Information Systems until the appearance of Intelligent Decision Support Systems IDSS It explains the most commonly used intelligent techniques both data driven and model driven and illustrates the use of knowledge models in Decision Support through case studies The author pays special attention to the whole Data Science process which provides intelligent data driven models in IDSS The book describes main uncertainty models used in Artificial Intelligence to model inexactness covers recommender systems and reviews available development tools for inducing data driven models for using model driven methods and for aiding the development of Intelligent Decision Support Systems

EcoDesign for Sustainable Products, Services and Social Systems I Shinichi Fukushige, Hideki Kobayashi, Eiji Yamasue, Keishiro Hara, 2024-01-16 This 2 volume book highlights cutting edge ecodesign research and covers broad areas ranging from individual product and service design to social system design It includes business and policy design circular production life cycle design and management digitalization for sustainable manufacturing user behavior and health ecodesign of social infrastructure sustainability education sustainability indicators and energy system design Featuring selected papers presented at EcoDesign 2021 12th International Symposium on Environmentally Conscious Design and Inverse Manufacturing it also includes diverse interdisciplinary approaches to foster ecodesign research and activities In the context of Sustainable Development Goals SDGs in particular SDG 12 Responsible Consumption and Production it addresses design innovations for sustainable value creation considering technological developments legislation and consumer lifestyles Further the book discusses the concept of circular economy which aims to develop circular business models for resource efficient society by taking advantage of digital technologies including artificial intelligence internet of things digital twin data analysis and simulation Written by experts from academia and industry Volume 1 highlights sustainable design such as product and process design collaborative

design sustainable innovation digital technologies design methodology for sustainability and energy system design The methods tools and practices described are useful for readers to facilitate value creation for sustainability

Implicit and Explicit Semantics Integration in Proof-Based Developments of Discrete Systems Yamine Ait-Ameur, Shin Nakajima, Dominique Méry, 2020-07-27 This book addresses mechanisms for reducing model heterogeneity induced by the absence of explicit semantics expression in the formal techniques used to specify design models More precisely it highlights the advances in handling both implicit and explicit semantics in formal system developments and discusses different contributions expressing different views and perceptions on the implicit and explicit semantics The book is based on the discussions at the Shonan meeting on this topic held in 2016 and includes contributions from the participants summarising their perspectives on the problem and offering solutions Divided into 5 parts domain modelling knowledge based modelling proof based modelling assurance cases and refinement based modelling and offers inspiration for researchers and practitioners in the fields of formal methods system and software engineering domain knowledge modelling requirement analysis and explicit and implicit semantics of modelling languages

Engineering Secure Future Internet Services and Systems Maritta Heisel, Wouter Joosen, Javier López, Fabio Martinelli, 2014-05-22 This State of the Art Survey contains a selection of papers representing state of the art results in the engineering of secure software based Future Internet services and systems produced by the NESSoS project researchers The engineering approach of the Network of Excellence NESSoS funded by the European Commission is based on the principle of addressing security concerns from the very beginning in all software development phases thus contributing to reduce the amount of software vulnerabilities and enabling the systematic treatment of security needs through the engineering process The 15 papers included in this volume deal with the main NESSoS research areas security requirements for Future Internet services creating secure service architectures and secure service design supporting programming environments for secure and composable services enabling security assurance and integrating former results in a risk aware and cost aware software life cycle
