Sanchez,2025-09-22 This book aims to introduce planners to AI outlining essential concepts terminologies and methodologies AI now promises to reshape urban planning but as with many technological innovations AI also introduces ethical practical and organizational challenges Understanding both AI s current capabilities and its limitations is essential for planners even as we acknowledge the rapid and unpredictable nature of its evolution Chapters address some of these complexities not by providing definitive answers but by introducing urban planners to core AI topics The book shows how planners can effectively use AI in their daily practices engage constructively with technical specialists and critically assess the appropriateness of these technologies in different planning contexts This book will be of interest to both urban planning professionals and researchers [Proceedings, International Conference on Image Processing IEEE Signal Processing Society,1996](#) **Language Machines** Leif Weatherby,2025-06-24 How generative AI systems capture a core function of language Looking at the emergence of generative AI Language Machines presents a new theory of meaning in language and computation arguing that humanistic scholarship misconstrues how large language models LLMs function Seeing LLMs as a convergence of computation and language Leif Weatherby contends that AI does not simulate cognition as widely believed

but rather creates culture This evolution in language he finds is one that we are ill prepared to evaluate as what he terms remainder humanism counterproductively divides the human from the machine without drawing on established theories of representation that include both To determine the consequences of using AI for language generation Weatherby reads linguistic theory in conjunction with the algorithmic architecture of LLMs He finds that generative AI captures the ways in which language is at first complex cultural and poetic and only later referential functional and cognitive This process is the semiotic hinge on which an emergent AI culture depends Weatherby calls for a general poetics of computational cultural forms under the formal conditions of the algorithmic reproducibility of language Locating the output of LLMs on a spectrum from poetry to ideology Language Machines concludes that literary theory must be the backbone of a new rhetorical training for our linguistic computational culture PC AI ,1991 *Industrial Engineering* George Worthington,1899 IJCAI ,1979 **1001 Programming Resources** Edward J.
