Prince, 2021-01-14 At the beginning of the twentieth century field artillery was a small separate unsupported branch of the U S Army By the end of World War I it had become the King of Battle a critical component of American military might *Million Dollar Barrage* tracks this transformation Offering a detailed account of how American artillery crews trained changed adapted and fought between 1907 and 1923 Justin G Prince tells the story of the development of modern American field artillery a tale stretching from the period when field artillery became an independent organization to when it became an equal branch of the U S Army The field artillery entered the Great War as a relatively new branch It separated from the Coast Artillery in 1907 and established a dedicated training school the School of Fire at Fort Sill in 1911 Prince describes the challenges this presented as issues of doctrine technology weapons development and combat training intersected with the problems of a peacetime army with no good industrial base His account which draws on a wealth of sources ranges from debates about U S artillery practices relative to those of Europe to discussions of the training equipping and performance of the field artillery branch during the war Prince follows the field artillery from its plunge into combat in April 1917 as an unprepared organization to its emergence that November as an effective fighting force with the Meuse Argonne Offensive proving the pivotal point in the branch s fortunes *Million Dollar Barrage* provides an unprecedented analysis of the ascendance of field artillery as a key factor in the nation s military dominance Start Small FINISH BIG Fred De Luca, John P.
