Artificial Intelligence Ethics and International Law

Abhivardhan, 2019-09-20 Artificial Intelligence may be the disruptive tech to influence our lives but in the end it has its own species to grow so let us not take it as something we use and leave. Key features: The book gives a lucid introduction to the idea of AI Ethics and its geopolitical implications. The book is insightful for an academic understanding of AI Ethics in the concept of Legal Personality meant for every person including professionals in the field of Law, Social Sciences, and Technology Studies. The book provides a special understanding and renders curiosity for readers to establish newer ideas and understand Artificial Intelligence from a socio-cultural scenario. The book gives a cogent aspect of the relationship between Artificial Intelligence and International Law. The book presents about an innovative and dimensional idea of Privacy with respect to AI in Legal Theory Description. The book enters with its first chapter providing a simple and legal backdrop of the idea behind AI Ethics and International Law, its references, and some important analogies and conceptual ideas. Also, the first chapter introduces some problems and questions regarding AI for contemplation in the field of jurisprudence. The second chapter vividly focuses on the deeper aspect of Artificial Intelligence and goes to the principled developments of pure international law with special analysis of the conceptions of sovereignty, self-determination, and human rights. The chapter explores the catchy world of design and technology and covers with the diversity of issues revolving Artificial Intelligence Ethics. The third chapter gets specific with International Law and paves on ways towards the idea of the Privacy Doctrine conceived by the author. The chapter also explores the conceptual propositions in the field of Artificial Intelligence and International Law and renders about the scope of culture as a part of the social ecosystem to affect artificial intelligence. The chapter also lays the origination of the idea of an AI as an Entity with special examples. The fourth chapter is centric towards human rights, making the debate beyond the legal literature and pragmatizing about the corporate idea of innovation and customer experience in various tech companies and institutions. The final chapter digs deeper into the principles and realms of cosmopolitanism and globalization, giving ways to discover and embark upon the role of human empathy and understanding to solve the issues that disruptive technology renders in its canvas. What will you learn? The reader will learn about artificial intelligence in the eyes of a social animal beyond the technical aspect of it. It enables the reader to challenge the conventional understanding of artificial intelligence and gives a motivation to understand the deep connect that AI is capable to create with humans in its social, economic, and cultural scenarios. It also poses a sense of curiosity and humility for people to understand the legal and social role of disrupting tech, whether they are in a developed country or a developing one. Who is this book for? This book is based for students, academicians, educationists, professionals, and policy researchers in the field of law, social sciences, management, and technology to understand and get a special insight of artificial intelligence for mankind. It is also a good read for a layman audience to get into the idea of artificial intelligence ethics for

To be healed or to be hacked Paula Friedrich,2025-11-10 The high prevalence of mental health disorders worldwide has created a big demand on mental health care professionals To relieve personnel and provide increased access to care the use of AI and VR has been researched for many decades As the human centered implementation of AI remains scarce we first assessed mental health patients concerns about the use of AI for therapy in an online questionnaire The pre study revealed the importance of data autonomy and transparency which was explored in a subsequent in person VR study regarding the

effect on self disclosure and trust towards the embodied AI Results suggest a higher level of self disclosure with higher data autonomy Transparency did not influence level of self disclosure and both autonomy and transparency showed no effect on trust towards the AI Additionally an effect of gender on trust was found showing higher levels of trust for women compared to men This work contributes to the ethical discussion around AI in mental health care with a human centered AI perspective and insights into patients concerns on this development
