Infrastructure Dr. Subodh Sachan, Dr. K Yogesh, Prof. Dr. Punit Goel, Niharika Singh, 2026-03-08 Why This Book Now In today's era of unprecedented technological acceleration product management is no longer the sole domain of customer facing apps or consumer driven innovation The backbone of modern enterprises cloud infrastructure distributed systems and artificial intelligence AI requires product leaders who can think both strategically and technically Yet many frameworks and conversations around product management continue to focus on surface level experiences leaving the crucial work of technical product managers TPMs in infrastructure and AI underexplored This book arises from a growing realization the professionals who lead from the middle are shaping the future These individuals do not always sit at the executive table nor do they exclusively write production code Instead they thrive in the tension filled space where engineering realities meet business ambitions As AI technologies redefine industries and infrastructure underpin every digital experience there is an urgent need for a guide that addresses the unique challenges and opportunities faced by TPMs in these domains From Experience to Practice The ideas presented here are not theoretical abstractions but grounded in lived experience and practice Over the past decade I have witnessed firsthand how TPMs navigate trade offs between scalability and speed compliance and experimentation innovation and stability Their influence is not always visible yet it is deeply impactful This book distills those lessons into practical strategies frameworks and case studies that readers can immediately apply to their own contexts By blending stories from cloud native transformations AI driven product launches and global scale infrastructure projects the book aims to connect abstract leadership principles with actionable steps Each chapter is designed to move seamlessly from concepts to practice equipping readers with tools to make better decisions inspire teams and deliver outcomes that matter Structure of the Book The book is organized to mirror the journey of a TPM It begins with

the essence of leading from the middle and builds the foundation of technical fluency. It then moves into critical skills such as stakeholder management, product strategy and roadmap creation, followed by deeper dives into execution, measurement and resilience. Later chapters explore the future trajectory of infrastructure and AI product management and culminate in the call to become transformational leaders.

Who Should Read This Book This book is written for anyone who operates at the crossroads of technology and leadership. Aspiring TPMs will find it a roadmap into the profession. Experienced product leaders will discover frameworks to refine their practice and expand their influence. Engineers considering a transition into product management will gain insight into how to leverage their technical strengths in leadership roles. Finally, executives and organizational leaders will benefit from understanding the vital yet often overlooked role that TPMs play in bridging vision and execution.
