Music Therapy and Music-Based Interventions in Neurology Kerry Devlin, Kyurim Kang, Alexander Pantelyat, 2024-02-16

This book synthesizes knowledge about the myriad ways music can support the physical and psychosocial needs of people living with neurological diagnoses. It may be a useful tool for those working or training as music therapists as well as clinicians and patients interested in the use of music and rhythm to address individualized healthcare goals. The editors of this book advocate for a collaborative holistic approach to the implementation of music based interventions, acknowledging that different and at times conflicting approaches do exist and that different patients may require exploration of different approaches to have their needs and desires met in ways most meaningful to them. The book's many contributors embody this desire to hold space for wide ranging views on clinical practice through the ways they share their own perspectives as music therapists, neurologists, nurses, speech and language pathologists, and neuroscience researchers from across the globe. Each chapter is centered around clinical work in context with a specific patient community, be that a diagnosis (e.g., movement disorders), shared culture (e.g., autistic culture), disease stage (e.g., end of life), or targeted clinical need (e.g., psychosocial support and/or functional performance), and features a summary of available research with case examples and clinical descriptions to highlight different conceptualizations of the role of music in the care of patients with neurologic diagnoses.

Handbook of Perinatal and Neonatal Palliative Care Rana Limbo, Charlotte Wool, Brian Carter, 2019-11-11. The first resource of its kind, this authoritative handbook holistically addresses the multidimensional aspects of perinatal and neonatal palliative care. Written by an interprofessional team of renowned specialists, it is both a text and an evidence-based reference for all members of the palliative care team. This book helps individual team members forge interdisciplinary approaches to care, assess current programs, improve the quality of care, and tailor new models of care. Encompassing the perspectives of numerous multidisciplinary healthcare providers, the book underscores the unique aspects of perinatal and neonatal palliative care with a focus on improving quality of life as well as comfort at the end of life. It describes healthcare for neonates and pregnant mothers, care and support of the family, planning and decision making, and effective support for grief and bereavement, addressing all palliative and neonatal care settings. Other chapters focus on the prenatal period after diagnosis of the expected baby's life-threatening condition. These include such topics as care of the mother delivering devastating news and advance care planning. Each chapter contains photos, figures, and/or tables, and case studies with clinical implications and critical thinking questions. Also included is an extensive listing of relevant palliative care organizations. Paintings and poetry provide an artistic backdrop to the authors' inspiring words.
