**The Significance of High Value in Human Behaviour** Chris Steed,2019-03-01 The Significance of High Value in Human Behaviour is an innovative conceptualisation of how the quest for a high self worth works as a psychosocial dynamic presenting the idea that feelings of impotence and low self esteem induce a powerful impetus on negative human action This book gives an account of what it means to base a whole psychological perspective on high value which has been an understudied aspect of human action Employing an ethnographical approach the book uses client observations and social research to promote original solutions in an empathetic and engaging manner for psychological support services aiding isolated individuals It considers the concept of a valuable self and examines the negative effects within the personality which

can be generated when this drive for a valuable self is blocked through human devaluation or violence The Significance of High Value in Human Behaviour will appeal to academics and post graduate students in the fields of psychology and psychotherapy psychotherapists with specialist interests in loneliness and self worth and sociologists concerned with the psychology of the self *Organizational Change* Gene Deszca, Cynthia Ingols, Evelina Atanassova, Tupper F.
