Ephemeral Retailing Ghaliya Boustani,2019-07-26 Often described as the hottest retail phenomenon ephemeral retail concerns the growth of pop up stores as a new mode of retailing These temporary stores pop up without notice quickly attract crowds then disappear or morph into something else Although they share similarities with traditional physical stores and online stores ephemeral stores outshine existing retail formats as they have many unique and differentiating characteristics These stores are becoming more popular among distribution channels as they offer exclusive and surprising retail experiences Many established brands have already integrated these new points of sale into their distribution channels while other brands are adopting them to raise communication awareness sales or just for experimentation This phenomenon is finding its place amongst retailers not only for its efficiency and effectiveness but also for its unique impact providing a sense of novelty that makes it particularly

attractive to postmodern consumers seeking hedonic experiences This concise text introduces all aspects of this growing phenomenon and contextualises it within existing channels of distribution It explores brand atmospheric interventions that are designed to affect customer emotions behaviours or experiences as well as practices retailers adopt to build relationships with their customers It will be of interest to scholars and advanced students in retail marketing and branding
