Organizational Velocity Alan Amling, 2022-03-04 If you're not operating with Organizational Velocity you're getting lapped and don't even realize it. Business as usual. Established organizations are being disrupted as nimble upstarts cross long established competitive moats with increasing ease. The status quo needs to be blown up. In *Organizational Velocity* veteran UPS executive Alan Amling distills five years of research and three decades on the front lines of Corporate America to reveal a fundamental truth: Moving at the speed of change is a choice, not a circumstance. Companies from Amazon to Shaw Industries stay ahead of the curve by operating with Organizational Velocity, a rapid learning paradigm empowering organizations to create persistent advantage. Amling shows how companies get in their own way and provides pragmatic insights from industrial, digital, and military leaders to break through organizational friction and thrive in disruption. *Organizational Velocity* is for current and aspiring executives seeing the disruption at their doorstep but not knowing how to break through the cloud of uncertainty. So dog-ear the pages and create a company built to stay ahead of the curve.

Wired TV Denise Mann, 2014-02-11 This collection looks at the post-network television industry's heady experiments with new forms of interactive storytelling or wired TV that took place from 2005 to 2010 as the networks responded to the introduction of broadband into the majority of homes and the proliferation of popular participatory Web 2.0 companies like Facebook, YouTube, and Twitter. Contributors address a wide range of issues from the networks' sporadic efforts to engage fans using transmedia storytelling to the production inefficiencies that continue to dog network television to the impact of multimedia convergence and multinational corporate conglomeration on entrepreneurial creativity. With essays from such top scholars as Henry Jenkins, John T. Caldwell, and Jonathan Gray and from new and exciting voices emerging in this field, *Wired TV* elucidates the myriad new digital threats and the equal number of digital opportunities that have become part and parcel of today's post-network era. Readers will quickly recognize the familiar television franchises on which the contributors focus, including *Lost*, *The Office*, *Entourage*, *Battlestar Galactica*, *The L Word*, and *Heroes*, in order to reveal their impact on an industry in transition. While it is not easy for vast bureaucracies to change course, executives from key network divisions engaged in an unprecedented period of innovation and collaboration with four important groups: members of the Hollywood creative community who wanted to expand television's storytelling worlds and marketing capabilities by incorporating social media; members of the Silicon Valley tech community who were keen to rethink television distribution for the digital era; members of the Madison Avenue advertising community who were eager to rethink ad-supported content; and fans who were enthusiastic and willing to use social media story extensions to proselytize on behalf of a favorite network series. In the aftermath of the lengthy Writers Guild of America strike of 2007-2008, the networks clamped down on such collaborations and began to reclaim control over their operations, locking themselves back into an aging system of interconnected bureaucracies, entrenched hierarchies, and traditional partners from the past. What's next for the future of the television?
