

## Football Time!

Story By: Andrew Frinkle

Walter played football. It was his favorite sport. He didn't mean the football that most of the world meant, either. Most of the world called soccer "football." That kind of made sense to call soccer that, because you play soccer with your feet, but he meant American football, which was actually a lot closer to rugby.

Football is expensive to play in its full version. Sure, a lot of people play a friendly game in their back yards or in the park, but that is not full tackle football usually. You can also play a no-tackle version with flags tied around your waist called flag football. It's very fun and doesn't cause many injuries. Walter played full contact football though, and that meant a helmet with a faceguard, full shoulder pads, along with pads for his hips, back, ribs, and thighs. He also needed cleats, gloves, a mouth guard, and a chinstrap. It didn't hurt to have elbow pads either. When it came to football, it was like knights in an old joust: you were going to get hit, so be prepared.

Football has 4 quarters of 15 minutes each. Football can take a long time to play, because there is a lot of stopping of the clock, a LOT of it. If a catch is dropped, if a penalty flag is thrown, if a whistle is blown, if there is an injury, if a team scores, between quarters, if the ball goes out of bounds... there are a lot of reasons to stop the clock, so that means you get a pretty full 60 minutes of actual heavy-hitting plays. Each play starts and ends with the crash of helmets and people running all over the field to stop the ball from moving.

Football is played on a 100 yard field with 10 yards of end zones on each side, so it's really 120 yards. If a team can run the ball into or catch the ball in the opponent's end zone, they get a touchdown, which is worth 6 points and a chance for an extra point (or a special 2-point conversion). If a team kicks the ball between their opponent's field goal posts, they get 3 points. There is also a special 2 point safety where you tackle the opponent in their own end zone, but this rarely happens. Generally speaking, football scores come in 7's (6 + 1 extra point) and 3's.

Football has a lot of players with a lot of positions. Each team has 11 men on the field at any given time. Positions vary for defense and offense, and the whole set of players switches when a team goes from offense to defense. There are also other sets of players for specific situations, which is called special teams. So, each team really needs 3 sets of players, plus backups for injuries. A good football squad is often 60 or more players! Players had specialized jobs to play in certain areas, to protect the ball, to kick the ball, to throw ball, or many other things!

The offensive unit is lead by the quarterback. He is defended by a line of men, whose job it is to stop him from getting tackled, so he has time to hand the ball off to a running back or fullback or to throw the ball to a receiver or tight end down the field. Those are the two ways to move the ball: running it or throwing it. The important thing is to move 10 yards in 4 tries. If you can't move the ball that far, the other team gets the ball, so usually a team gives up its 4<sup>th</sup> try to kick the ball way down the field and give the other chance their turn. If you make it the 10 yards (or more), you get 4 fresh tries. You keep moving the ball down the field, sometimes in short stretches and sometimes in long amounts, and then you score.
