Fontana,R.W. Staettle,1980 This series was organized to provide a forum for review papers in the area of corrosion The aim of these reviews is to bring certain areas of corrosiou science and technology into a sharp focus The volumes of this series are published approximately on a yearly basis and each contains three to five reviews The articles in each volume are selected in such a way as to be of interest both to the corrosion scientists and the corrosion technologists There is in fact a particular aim in juxtaposing these interests because of the importance of mutual interaction and interdisciplinarity so important in corrosion studies It is hoped that the corrosion scientists in this way may stay abreast of

the activities in corrosion technology and vice versa In this series the term corrosion is used in its very broadest sense It includes therefore not only the degradation of metals in aqueous environment but also what is commonly referred to as high temperature oxidation Further the plan is to be even more general than these topics the series will include all solids and all environments Today engineering solids include not only metals but glasses ionic solids polymeric solids and composites of these Environments of interest must be extended to liquid metals a wide variety of gases nonaqueous electrolytes and other non aqueous liquids Processing and Fabrication of Advanced Materials VI K. A. Khor,1998 *Research Anthology on Emerging Technologies and Ethical Implications in Human Enhancement* Management Association, Information Resources,2020-12-18 Along with the introduction of technology in nearly every facet of human life comes the question of the ethical side of using technology to improve the human condition whether that be physically or mentally The capabilities of human enhancement technologies have created a dual sided approach to discussing human enhancement the critical approach of attempting to reach human perfection and the ethics within that idea and the endless capabilities of technology that have greatly impacted the medical field It is essential to discuss both aspects within these emerging technologies whether as separate entities or as cohesive units Ranging from disease detection and treatment to implants and prosthetics to robotics and genetic engineering human enhancement technologies are widespread and multi purposed By going beyond the capabilities of human hands these technologies have propelled modern medicine and healthcare to new levels that have allowed humans to face new treatments or assistive technologies not seen before The Research Anthology on Emerging Technologies and Ethical Implications in Human Enhancement covers the primary technologies and tools being used in medicine and healthcare along with discussions on the ethics of enhancing the human body Topics covered include prosthetics and implants robotics human disorders diseases and treatments and smart technologies along with law and theory This publication serves as a valuable reference work for doctors medical professionals researchers students professionals and practitioners involved in fields that include ethics medicine computer science robotics genetics assistive technologies nanotechnology biomedical engineering and biotechnology **Aluminium** ,2000 Mechanical and Electrical Technology VII Guang Hsu Chang,Jieh Shian Young,Wirachman Wisnoe,2015-10-19 Selected peer reviewed papers from the 2015 7th International Conference on Mechanical and Electrical Technology ICMET 2015 July 1 2 2015 Bali Indonesia **Proceedings of ...
