Nature-Inspired Algorithms for Big Data Frameworks Banati, Hema, Mehta, Shikha, Kaur, Parmeet, 2018-09-28 As technology continues to become more sophisticated, mimicking natural processes and phenomena becomes more of a reality. Continued research in the field of natural computing enables an understanding of the world around us in addition to opportunities for man-made computing to mirror the natural processes and systems that have existed for centuries. *Nature Inspired Algorithms for Big Data Frameworks* is a collection of innovative research on the methods and applications of extracting meaningful information from data using algorithms that are capable of handling the constraints of processing time, memory usage, and the dynamic and unstructured nature of data. Highlighting a range of topics including genetic algorithms, data classification, and wireless sensor networks, this book is ideally designed for computer engineers, software developers, IT professionals, academicians, researchers, and upper-level students seeking current research on the application of nature and biologically inspired algorithms for handling challenges posed by big data in diverse environments.

Automated Grammatical Error Detection for Language Learners Claudia Leacock, Martin Chodorow, Michael Gamon, Joel Tetreault, 2022-11-10 It has been estimated that over a billion people are using or learning English as a second or foreign language, and the numbers are growing, not only for English but for other languages as well. These language learners provide a burgeoning market for tools that help identify and correct learners' writing errors. Unfortunately, the errors targeted by typical commercial proofreading tools do not include those aspects of a second

language that are hardest to learn This volume describes the types of constructions English language learners find most difficult constructions containing prepositions articles and collocations It provides an overview of the automated approaches that have been developed to identify and correct these and other classes of learner errors in a number of languages Error annotation and system evaluation are particularly important topics in grammatical error detection because there are no commonly accepted standards Chapters in the book describe the options available to researchers recommend best practices for reporting results and present annotation and evaluation schemes The final chapters explore recent innovative work that opens new directions for research It is the authors hope that this volume will contribute to the growing interest in grammatical error detection by encouraging researchers to take a closer look at the field and its many challenging problems

Approaches to Handle Scarce Resources for Bengali Statistical Machine Translation Maxim Roy,2010

Machine translation MT is a hard problem because of the highly complex irregular and diverse nature of natural language MT refers to computerized systems that utilize software to translate text from one natural language into another with or without human assistance It is impossible to accurately model all the linguistic rules and relationships that shape the translation process and therefore MT has to make decisions based on incomplete data In order to handle this incomplete data a principled approach is to use statistical methods to make optimum decisions given incomplete data Statistical machine translation SMT uses a probabilistic framework to automatically translate text from one language to another Using the co occurrence counts of words and phrases from the bilingual parallel corpora where sentences are aligned with their translation SMT learns the translation of words and phrases We apply SMT techniques for translation between Bengali and English SMT systems requires a significant amount of bilingual data between language pairs to achieve significant translation accuracy However being a low density language such resources are not available in Bengali So in this thesis we investigate different language independent and dependent techniques which can be helpful to improve translate accuracy of Bengali SMT systems We explore the transliteration module prepositional and Bengali compound word handling module in the context of Bengali to English SMT Further we look into semi supervised techniques and active learning techniques in Bengali SMT to deal with scarce resources Also due to different word orders in Bengali and English we also propose different syntactic phrase reordering techniques for Bengali SMT We also contributed toward Bengali SMT by creating a new test set lexicon and by developing Bengali text processing tools such as tokenizer sentence segmenter and morphological analyzer Overall the main objective of this thesis is to make a contribution towards Bengali language processing provide a general foundation for conducting research in Bengali SMT and improve the quality of Bengali SMT
