Business Data Communications 7th Edition:

Business Data Communications William Stallings, Thomas L. Case, 2012-11 *Business Data Communications and Security* covers the fundamentals of data communications networking distributed applications and network management and security. These concepts are presented in a way that relates specifically to the business environment and the concerns of business management and staff. While making liberal use of real world case studies and charts and graphs to provide a business perspective, the book also provides the student with a solid grasp of the technical foundation of business data communications. The diverse set of projects and student exercises enables the instructor to use the book as a component in a rich and varied learning experience and to tailor a course plan to meet the specific needs of the instructor and students. This edition features a new co author Dr Thomas L Case Professor and Chair of the Department of Information Systems at Georgia Southern University. New coverage of security related issues is included in relevant places throughout the book to meet the needs of the IT IS schools using this book and the growing emphasis on network security. Additionally, the Seventh edition now aligns with the ACM AIS IS 2010 curriculum model.
