Mark Anderson,2019-11-20 As a trader you have to come up with various strategies in order for you to ensure that you do not make losses when buying and selling stocks You must be in a position to predict how the market will be in the near future This will give you an insight into whether you should invest your money in the stock market or not You will be required to analyze all the technical indicators in order for you to be able to tell whether the stock prices will go up or not The difference between day traders and swing traders is that the day traders monitor all the price movements in the stock in order for them to be able to tell whether they should buy or sell their stocks The swing traders are however never interested in the prices of the stocks at any given time This means that they can trade at any given time Their interest is the long term benefits they get from the stock market The swing trader will invest their money in a hurry and expect to get returns quickly They may be lucky to make profits at times but they may also be unlucky to make losses With swing trading one has to be a risk taker to indulge in it This means that they should be ready for loses even as they make profits However they can make sure that they know where their support comes from They should also be able to identify their resistance levels through the use of technical analysis This will be of great help in ensuring that they are excellent traders Most traders do not like swing trading This is because it is said to be riskier It is risky since the trader s interest is on the profits they make as they close the stocks This means that they can either make profits or losses since the market is not predictable They may find themselves getting shocked as a result of a change in the economy hence change in the prices in the market The interest rates would be too high which will make them get losses Who would want to be in a situation where they make losses after investing all their money

in the stock market No one would want that to happen to them We all look forward to better days We want to make profits and expand reinvest again It is therefore important for one to ensure that they take their time before investing in the market in order for them to ensure that they minimize the chances of making losses In this book you will learn The Basics of Swing Trading Characteristics of a Swing Trader How to start Swing Trading The Difference between Investor and Trader Finding a Suitable Market Buying and Selling of Stocks Platform and Tools of Trading Fundamental and Technical Analysis Understanding Support and Resistance Levels Time and Money Management The mindset of a Successful Trader Goals Objectives Routine of a Swing Trader Would you like to Learn More Download this book Scroll to the top page and select buy now button
