potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era [Apple](#) David Pogue, 2026-03-10 In time for Apple's 50th anniversary CBS Sunday Morning correspondent David Pogue tells the iconic company's entire life story how it was born nearly died was born again under Steve Jobs and became under CEO Tim Cook the most valuable company in the world The book features full color photos new facts that correct the record and illuminate its subversive culture and fresh interviews with the legendary figures who shaped Apple into what it is today On April 1 1976 two scruffy twentysomethings both named Steve founded a startup Their goal To bring the revolutionary power of computers to everyone Over the next five decades Apple reshaped the technology and cultural landscapes introducing the public to breakthroughs like the mouse laser printing CD ROM WiFi digital video home networking touchscreen phones and tablets Jobs's obsessive eye for detail set the stage for products Mac iMac iPod iTunes iPhone iPad AirPods Apple Watch that married advanced technology with beauty simplicity and fine design Deeply researched and lavishly illustrated Apple The First 50 Years includes new interviews with 150 key people who made the journey including Steve Wozniak John Sculley Jony Ive and many current designers engineers and executives The book busts long held myths goes backstage for both the titanic
