Practical Bovine Immunology John Ellis, Victor Cortese, 2026-01-29 Aimed at the busy practicing bovine veterinarian students in their clinical years and professionals in allied fields this book focuses on the various aspects of bovine immunology Maintaining a functioning immune system is critical for not only protecting the health and welfare of cattle but also to maximize profitability from any cattle enterprise Those working in the field find themselves dealing daily with the application of immunologic concepts be it for our understanding of vaccines infectious diseases or non infectious syndromes Structured in two parts the volume begins concept focused with key components of the immune system Throughout you will always find examples of important species differences as they relate to cattle Chapters in the second part are systems focused covering areas of application and novel concepts in bovine immunology Each contribution ends with a vivid case study that highlights utilization of the covered material The cases are followed by key questions that apply concepts to practical situations Answers are carefully provided in the book s appendix Rather than a comprehensive textbook on immunology this guide stresses applications and common questions arising in day to day bovine practice Aspiring specialists will likewise appreciate this illustrative reference with accessible readability

Nature-Inspired Sensors Hossam Haick, 2024-10-24 Nature Inspired Sensors presents and discusses the basic principles and latest developments in nature inspired sensing and biosensing materials as well as the design and mechanisms for analyzing their potential in multifunctional sensing applications The book starts with a comprehensive review of certain fundamental mechanisms in different living creatures including humans animals and plants It presents and discusses ways for imitating various nature inspired structural features and their functional properties such as hierarchical interlocked porous and bristle like structures and hetero layered brick and mortar structures It also highlights the utility of these structures and their properties for sensing functions which include static coloration self cleaning adhesive underwater navigation and object detection electric charge generation and sensitive olfactory functions for detecting various substances This is followed by an appraisal of accumulating knowledge and its translation from the laboratory to the point of care phase using selective sensors as well as desktop and wearable artificial sensing devices for example electronic noses and electronic skins in conjunction with AI assisted data processing and decision making in the targeted field of application In addition the book offers an insight into the challenges of continuing the development of nature inspired smart sensing and biosensing technology and their wider availability which can be substantially improved It is a valuable reference for graduates undergraduates researchers and working professionals in the fields of chemistry materials science and biomedical and environmental science Discusses the current strategies for fabricating nature derived bio chemical sensors Presents ways to apply nature derived bio chemical sensors in real life Describes the future of nature derived bio chemical sensors

Cancer Systems Biology, Bioinformatics and Medicine Alfredo Cesario, Frederick Marcus, 2011-08-21 This teaching monograph on systems approaches to cancer research and

clinical applications provides a unique synthesis by world class scientists and doctors of laboratory computational and clinical methods thereby establishing the foundations for major advances not possible with current methods Specifically the book 1 Sets the stage by describing the basis of systems biology and bioinformatics approaches and the clinical background of cancer in a systems context 2 Summarizes the laboratory clinical data systems analysis and bioinformatics tools along with infrastructure and resources required 3 Demonstrates the application of these tools to cancer research 4 Extends these tools and methods to clinical diagnosis drug development and treatment applications and 5 Finishes by exploring longer term perspectives and providing conclusions This book reviews the state of the art and goes beyond into new applications It is written and highly referenced as a textbook and practical guide aimed at students academics doctors clinicians industrialists and managers in cancer research and therapeutic applications Ideally it will set the stage for integration of available knowledge to optimize communication between basic and clinical researchers involved in the ultimate fight against cancer whatever the field of specific interest whatever the area of activity within translational research

Low Dose Exposures in the Environment C. Streffer,H. Bolt,D. Follesdal,P. Hall,J.G. Hengstler,P. Jacob,D Oughton,K. Prieß,E. Rehbinder,E. Swaton,2013-11-11 The ever increasing release of harmful agents due to human activities have led in some areas of the world to heavy pollution In order to protect human health and the environment environmental standards that shall limit the release and the concentration of those toxic agents in the environment and hence the exposure to it have to be established The related assessment and decision making procedures have to be based on solid scientific data about the effects and mechanisms of these agents as well as on ethical social and economic aspects For risk evaluation the knowledge of the dose response curve is an essential prerequisite Dose responses without a threshold dose are most critical in this connection Such dose responses are assumed for mutagenic and carcinogenic effects which therefore dominate also the discussion in this book In the environmentally important low dose range risk estimation can only be achieved by extrapolation from higher doses with measurable effects The extrapolation is accompanied with uncertainties which makes risk evaluation as well as risk communication frequently problematic In order to ensure rational efficient and fair decisions beyond a sound scientific assessment the dialogue between disciplines with the affected people and with the general public is necessary In this book the whole range of relevant and essential aspects of risk evaluation and standard setting is addressed Starting with the ethical foundations the sound analysis of recent scientific findings sets the frame for further reflections by theory of cognition psychosocial sciences and jurisprudence The authors end up with concluding recommendations for coping with the recent problems of standard setting in the field of environmentally relevant low doses The book is designed to a readership of scientists legislators administrators and the interested public

Immunoregulatory Aspects of Immunotherapy Seyyed Shamsadin Athari,2018-08-01 Immunotherapy is an innovative leading and valuable approach to the treatment and control of many diseases It can solve many problems of public health worldwide Many people in numerous countries are suffering from

a wide range of diseases communicable and non communicable that can be cured or controlled by the immune system and immunotherapy Some immunological diseases i e allergic reactions and asthma autoimmune disease immunodeficiency disease hypersensitivity reactions etc have immune response pathophysiology and by controlling immune system mechanisms these diseases can be controlled and cured Immunoregulatory Aspects of Immunotherapy focuses on immune system mechanism diagnosis treatment and other related problems The chapters have applicable and scientific data in immunotherapeutic approaches based on medical sciences and would be of benefit to all researchers in immunology allergy and asthma fields The book discusses the prevention diagnosis treatment and follow up of patients who have dangerous diseases We hope this book will be a new approach to the immunotherapy of diseases and will improve public health and wellbeing

Encyclopedia of Virology Brian W. J. Mahy, M. H. V. Van Regenmortel, 2008

Covers biological molecular and medical topics concerning viruses in animals plants bacteria and insects this new ed has been extensively revised and updated to reflect the 50 % increase in identified and accepted viruses since 2000 Includes information on avian flu SARS and West Nile and the ability of some viruses to be used as agents of bioterrorism

Novel Vaccination Strategies Stefan H. E. Kaufmann, 2004-03-12 The protection mode of the majority of vaccines is based on the induction of antibody responses Since efficient immune responses to many pathogens rely on activating all arms of the immune system traditional vaccine development does not provide efficient protection against many diseases Novel vaccination strategies need to allow presentation of antigens that can activate the full array of the immune response and should prevent pathogen entry by mobilizing the local mucosal immune response New technological advances make it possible to optimize the immunogenicity of live and sub unit vaccines This book offers an interdisciplinary overview on research and future strategies for rational vaccine design based on recent developments in molecular biology and immunology It covers new aspects of the immunological interplay between prokaryotic and eukaryotic systems as well as achievements in the development of novel vaccine candidates Chapters on edible vaccines on vaccines against bioterror agents and on economical and safety aspects of novel vaccine development round off this title

Inflammatory Bowel Disease Derek J. Chadwick, Jamie A. Goode, 2004-12-17 Inflammatory bowel disease IBD comprises a group of idiopathic diseases of the intestine characterized by chronic inflammation of the bowel with periods of exacerbation and remission Although the exact cause of IBD remains undetermined the condition appears to be related to a combination of genetic and environmental factors resulting in an aberrant activation of the mucosal immune system This book contains a series of interdisciplinary discussions between clinical and basic scientists focusing on key issues such as Epithelial cell and molecular biology including apoptosis necrosis and cell survival The role of bacterial milieu and mucosal bacteria in the IBD and of

prebiotic and probiotic therapy The progress towards the identification of susceptibility genes and phenotype determining genes The pharmacogenetics of IBD Mucosal immunology and therapeutic strategies stemming therefrom *Nature* Sir Norman Lockyer,2007 *The Journal of Immunology* ,2009 **Medical and Health Care Books and Serials in Print** ,1997 **American Book Publishing Record** ,2006 **Subject Guide to Books in Print** ,2001 **Whitaker's Book List** ,1991 Nutrition Abstracts and Reviews ,2006
