Venture Capital Performance Keith Arundale, 2019-11-22. European venture capital (VC) funds have historically underperformed their US counterparts. This has resulted in reduced investment into European VC by the traditional institutional investors. This book investigates the factors that give rise to the performance difference. It is based on the author's research at the Adam Smith Business School, University of Glasgow, which involved a qualitative study of some 64 VC firms in the UK, continental Europe, and the US, supplemented by 40 interviews with other stakeholders including limited partner investors, corporate venturers, entrepreneurs, and advisors. Readers will gain an in-depth understanding of the various structural, operational, and wider environmental factors that impact on the performance difference between UK, European, and US VC funds. The study is unique in that it provides for the first time a holistic and extensive analysis of the entire investment process, from sourcing deals to exiting deals, specifically contrasting Europe and the US in terms of the variables pertaining to the investment process and the impact on the fund performance. Factors impacting on the performance differential are structural, resulting from characteristics of the funds themselves, operational, such as the investment practices of the VC firms which manage the funds, and environmental, such as culture and attitude to risk, and the wider ecosystem in which the funds operate. These factors are set out clearly for the reader. The characteristics of the better-performing funds in Europe and the US are also investigated. The book is aimed at academics who are researching venture capital fund performance and investment practices, and also at practitioners, advisors, and policymakers who want to learn about best VC investment practices. Whilst the book is focused on European and US VC investing, the best practices are also pertinent for VC firms and funds setting up in other geographies, particularly in emerging markets. To this end, best practice guidelines based on the research are included.

The Return of the Moguls Dan Kennedy, 2018-03-06 The Return of the Moguls chronicles an important story in the making one that will affect more than just the newspaper business it has the power to change democracy as we know it Over the course of a generation the story of the daily newspaper has been an unchecked slide from record profitability and readership to plummeting profits increasing irrelevance and inevitable obsolescence The forces killing major dailies alternative weeklies and small town shoppers are well understood or seem obvious in hindsight at least and the catalog of publications that have gone under reads like a who s who of American journalism During the past half century old style press barons gave way to a cabal of corporate interests unable or unwilling to invest in the future even as technological change was destroying their core business The Taylor family sold the Boston Globe to the New York Times Company in 1993 for a cool 1.1 billion Twenty years later the Times Company resold it for just 70 million The unexpected twist to the story however is not what they sold it for but who they sold it to John Henry the principal owner of the Boston Red Sox A billionaire who made his money in the world of high finance Henry inspired optimism in Boston because of his track record as a public spirited business executive and because his deep pockets seemed to ensure that the shrunken newspaper would not be subjected to further downsizing In just a few days the sale of the Globe was overtaken by much bigger news Jeff Bezos the founder of Amazon and one of the world s richest people had reached a deal to buy the Washington Post for 250 million Henry s ascension at the Globe sparked hope Bezos s purchase seemed to inspire nothing short of ecstasy as numerous observers expressed the belief that his lofty status as one of our leading digital visionaries could help him solve the daunting financial problems facing the newspaper business Though Bezos and Henry are the two most prominent individuals to enter the newspaper business a third preceded them Aaron Kushner a greeting card executive acquired California s Orange County Register in July 2012 and then pursued an audacious agenda expanding coverage and hiring journalists in an era when nearly all other newspaper owners were trying to avoid cutting both The newspaper business is at a perilous crossroads This essential book explains why and how today s new crop of media moguls might help it to survive

VC Index Performance. Performance of Publicly Traded Venture Capital Indices Noah Paul,2023-10-17 Master s Thesis from the year 2021 in the subject Business economics Investment and Finance grade 8 1 10 TiasNimbis Business School course Investment Management language English abstract The

purpose of this study is to examine the performance of publicly traded Venture capital indices As these indices have become available to the public in 2012 allowing investors globally to gain exposure to the Venture Capital asset class It is of note that the indices were conceived in 1996 but only became available to the public in 2012 This raises the question if these Index funds are able to provide attractive returns or even beat the market In order to answer this question archival price datasets have been extracted for VC indices various benchmark indices and analyzed using the Sharpe ratio and Jensen s alpha The data extracted covers a 25 year time frame from 1995 2021 and is extracted in both monthly and annual time intervals Using this approach the research finds that one of the VC indices exceeds market risk adjusted returns in terms of the Sharpe ratio and Jensen s alpha in net and gross returns This finding contradicts the academic theory and should not be possible The other VC index show significant underperformance using both measures To conclude it is not possible to make any general statements using the present sample In regard to VC index performance Therefore it is suggested that further empirical research is conducted using a larger sample of VC indices while the outperformance of the TRVCINX is also investigated as it stands in contrast to the academic literature
