Across cultures it is seen as the site of emotions as well as the origin of life. We feel emotions in the heart from the heart-stopping sensation of romantic love to the crushing sensation of despair. And yet since the nineteenth century the heart has been redefined in medical terms as a pump, an organ responsible for the circulation of the blood. Emotions have been removed from the heart as an active site of influence and towards the brain. It is the brain that is the organ most commonly associated with emotion in the modern West. So why then do the emotional meanings of the heart linger? Why do many transplantation patients believe that the heart, for instance, can transmit memories and emotions, and why do we still refer to emotions as heartfelt? We cannot answer these questions without reference to the history of the heart as both physical organ and emotional symbol. *Matters of the Heart* traces the ways emotions have been understood between the seventeenth and nineteenth centuries as both physical entities and spiritual experiences. With reference to historical interpretations of such key concepts as gender, emotion, subjectivity and the self, it also addresses the shifting relationship from heart to brain as competing centres of emotion in the West. **Subject Guide to Books in Print**, 1991 *Current Catalog* National Library of Medicine (U.S.), First multi-year cumulation covers six years 1965-70 **Books in Print Supplement**, 1994 **British Books in Print**, 1971 *Forum*, 1980 English Mechanic and Mirror of Science and Art, 1913 *Saturday Review of Literature*, 1924 *The United States Catalog* Mary Burnham, Carol Hurd, 1928 *The Social Studies*, 1928 **Historical Outlook**, 1928 **Australian Books in Print 1999** K G Saur Books, 1999-04 Excellent coverage essential to worldwide bibliographic coverage.
