Resources in Education ,1999 Computer Aided Systems Theory - EUROCAST'99 Franz Pichler,Roberto Moreno-Diaz,Peter Kopacek,2007-03-02 Computer Aided Systems Theory CAST deals with the task of contributing to the creation and implementation of tools for the support of usual CAD tools for design and simulation by formal mathematical or logical means in modeling Naturally thebasisfortheconstructionandimplementationofCASTsoftwareis provided by the existing current knowledge in modeling and by the experience of practitioners in engineering design Systems Theory as seen from the viewpoint of CAST research and CAST tool development has the role of providing formal frameworks and related theoretical knowledge for model construction and model analysis We purposely do not distinguish sharply between systems theory and CAST and other similar elds of research and tool development such as for example in applied numerical analysis or other computational sciences TheheredocumentedEUROCASTconferencewhichtookplaceattheVienna University of Technology re ects current mainstreams in CAST As in the p vious conferences new topics both theoretical and application oriented have been addressed The presented papers show that the eld is widespread and that new velopments in computer science and in information technology are the driving forces

Theeditorswouldliketothanktheauthorsforprovidingtheirmanuscriptsin hardcopyandinelectronicformontime Thesta ofSpringer VerlagHeidelberg gave as in previous CAST publications valuable support in editing this volume General Systems Theory Jeffrey Yi-Lin Forrest,2018-12-19 This book demonstrates the theoretical value and practical significance of systems science and its logic of thinking by presenting a rigorously developed foundation a tool for intuitive reasoning which is supported by both theory and empirical evidence as well as practical applications in business decision making Following a foundation of general systems theory the book presents an applied method to intuitively learn system sciences fundamentals The third and final part examines applications of the yoyo model and the theoretical results developed earlier within the context of problems facing business decision makers by organically combining methods of traditional science the first dimension of science with those of systems science the second dimension as argued by George Klir in the 1990s This text would benefit graduate students researchers or practitioners in the areas of mathematics systems science or engineering economics and business decision science
