A Text Book of Environmental Chemistry and Pollution Control Dr. Harendra K. Sharma, Dr. Jayashree B Tirpude, Dr. Yogita K Meshram, Dr. Priyadarshini P Chahande, 2023-12-11 Contemporary science is not simple There are complex interrelationships between the various scientific disciplines that contribute to the comprehension of virtually every scientific issue and phenomenon Those Renaissance times when an individual could acquire a substantial amount of knowledge at their disposal are long since passed This is not attributable to a deficiency in individual capability but rather to the exponential growth of knowledge that is emblematic of our era Environmental Science and Environmental Chemistry in particular is utterly engrossed in this situation In the past environmental chemistry adopted a reactive stance wherein issues were identified and remedied subsequent to their occurrence such as when a catastrophe occurred or when the consequences were readily apparent to the environment such as when vegetation and animals were killed air and water conditions depleted or visibility was lost or when the stratospheric ozone layer was depleted Thus virtually everything that occurs in the world could be classified as environmental chemistry

Environmental Chemistry and Recent Pollution Control Approaches Hugo Saldarriaga-Noreña, Mario Alfonso Murillo-Tovar, Robina Farooq, Rajendra Dongre, Sara Riaz, 2019-12-18 In recent years there have been significant advances in the techniques of sampling and analysis which has allowed the more accurate recording of environmental levels of many substances present in the environment At the same time processes for the remediation of contaminated matrices have evolved through the application and or combination of biological physical and chemical procedures The purpose of this book is to present new studies aimed at determining levels of environmental pollution in various parts of the world It also shows new alternatives for the remediation of contaminated matrices
