Data Structures and Algorithms in Java Robert Lafore, 2017-09-06  
Data Structures and Algorithms in Java Second Edition is designed to be easy to read and understand although the topic itself is complicated Algorithms are the procedures that software programs use to manipulate data structures Besides clear and simple example programs the author includes a workshop as a small demonstration program executable on a Web browser The programs demonstrate in graphical form what data structures look like and how they operate In the second edition the program is rewritten to improve operation and clarify the algorithms the example programs are revised to work with the latest version of the Java JDK and questions and exercises will be added at the end of each chapter making the book even more useful Educational Supplement Suggested solutions to the programming projects found at the end of each chapter are made available to instructors at recognized educational institutions This educational supplement can be found at [www.prenhall.com](http://www.prenhall.com) in the Instructor Resource Center

*From Object-Oriented to Formal Methods* Olaf Owe, Stein Krogdahl, Tom Lyche, 2004-03-09 After Ole Johan's retirement at the beginning of the new millennium some of us had thought and talked about making a Festschrift in his honor When Donald Knuth took the initiative by sending us the first contribution the process began to roll In early 2002 an editing group was formed including Kristen Nygaard who had known Ole Johan since their student days and with whom he had developed the Simula language Then we invited a number of prominent researchers familiar with Ole Johan to submit contributions for a book honoring Ole Johan on the occasion of his 70th birthday Invitees included several members of the IFIP 2.3 working group a forum that Ole Johan treasured and enjoyed participating in throughout his career In spite of the short deadline the response to the invitations was overwhelmingly positive The original idea was to complete the book rather quickly to make it a gift he could read and enjoy because by then he had had cancer for three years and his health was gradually deteriorating Kristen had been regularly visiting Ole Johan who was in the hospital at that time and they were working on their Turing award speech Ole Johan was gratified to hear about the contributions to this book but modestly expressed the feeling that there was no special need to undertake a book project on his behalf Peacefully accepting his destiny Ole Johan died on June 29 2002

Data Abstraction and Problem Solving with C++ Frank M. Carrano, Janet J. Prichard, 2005 Designed for a second course in computer science this textbook introduces the data abstraction technique for building walls between a program and its data structures and presents various abstract data types and their implementations as C classes The author evaluates the advantages and disadvantages of array based and pointer based data structures and explains the concepts behind recursion inheritance polymorphism algorithm efficiency and

balanced search trees Annotation 2004 Book News Inc Portland OR booknews com *Humane Economics* Jack C. High, Don Lavoie, 2006-10-27 Don Lavoie's published work encompassed a wide range of subjects: socialism, hermeneutics, information technology, and culture. The subjects appear unrelated, but a close examination of his research reveals an underlying unity of thought and an economics at sharp variance with the post-World War II mainstream. By linking economics to other disciplines, Lavoie demonstrated that economics is closer to the humanities than to the physical sciences. The contributors to this volume explore Don Lavoie's legacy and its implications for economics.
