

Cisco Unified Computing System Site Planning Guide: Data Center Power and Cooling

This document provides a technical overview of power, space, and cooling considerations required for successful deployment of IT equipment in the data center. Topics are introduced with a high-level conceptual discussion and then discussed in the context of Cisco® products.

The Cisco Unified Computing System™ (Cisco UCS®) product line works with industry-standard rack and power solutions that are generally available for the data center. Cisco also offers racks and power distribution units (PDUs) that have been tested with Cisco UCS and selected Cisco Nexus® products.

This document is intended to inform those tasked with physical deployment of IT equipment in the data center. It does not discuss equipment configuration or deployment from the viewpoint of a system administrator.
