Data Communications and Networking Behrouz A. Forouzan,2007 Annotation As one of the fastest growing technologies in our culture today data communications and networking presents a unique challenge for instructors As both the number and types of students are increasing it is essential to have a textbook that provides coverage of the latest advances while presenting the material in a way that is accessible to students with little or no background in the field Using a bottom up approach Data Communications and Networking presents this highly technical subject matter without relying on complex formulas by using a strong pedagogical approach supported by more than 700 figures Now in its Fourth Edition this textbook brings the beginning student right to the forefront of the latest advances in the field while presenting the fundamentals in a clear straightforward manner Students will find better coverage improved figures and better explanations on cutting edge material The bottom up approach allows instructors to cover the material in one course rather than having separate courses on data communications and networking

Data Communications and Networking Global Edition 5e Behrouz A. Forouzan,2012-05-16 The fifth edition of Behrouz Forouzan's Data Communications and Networking presents a comprehensive and accessible approach to data communications and networking that has made this book a favorite with students and professionals alike More than 830 figures and 150 tables accompany the text and

provide a visual and intuitive opportunity for understanding the material This unique approach minimizes the need for heavy math content allowing normally complicated topics to unfold graphically and visually rather than through the presentation of complex formulas The global edition has been developed specifically to meet the needs of international computer networks students In addition to a chapter on the peer to peer paradigm a full chapter on quality of service QoS generous coverage of forward error correction coverage of WiMAX and material on socket interface programming in Java we have added new international end of chapter questions and problems to make the content more relevant and improve learning outcomes for the international student

DATA COMMUNICATION AND COMPUTER NETWORKS PAL, AJIT,2013-11-02 Intended primarily as a textbook for the students of computer science and engineering electronics and communication engineering master of computer applications MCA and those offering IT courses the book provides a comprehensive coverage of the subject Basic elements of communication such as data signal and channel alongwith their characteristics such as bandwidth bit internal and bit rate have been explained Contents related to guided and unguided transmission media Bluetooth wireless technology developed for Personal Area Network PAN and issues related to routing covering popular routing algorithms namely RIP OSPF and BGP have been introduced in the book Various aspects of data link control alongwith their application in HDLC network and techniques such as encoding multiplexing and encryption decryption are presented in detail Characteristics and implementation of PSTN SONET ATM LAN PACKET RADIO network Cellular telephone network and Satellite network have also been explained Different aspects of IEEE 802 11 WLAN and congestion control protocols have also been discussed in the book Key Features Each chapter is divided into section and subsection to provide flexibility in curriculum design The text contains numerous solved examples and illustrations to bring clarity to the subject and enhance its understanding Review questions given at the end of each chapter are meant to enable the teacher to test student s grasping of the subject
