new data mining paradigms The workshops brought together both data mining researchers and practitioners to discuss these two topics while seeking solutions to long standing data mining problems and stimulating new data mining research directions We feel that the papers presented at these workshops may encourage the study of data mining as a scientific field and spark new communications and collaborations between researchers and practitioners

To express the visions forged in the workshop to a wider range of data mining researchers and practitioners and foster active participation in the study of foundations of data mining we edited this volume by involving extended and updated versions of selected papers presented at those workshops as well as some other relevant contributions The content of this book includes studies of foundations of data mining from theoretical practical algorithmical and managerial perspectives The following is a brief summary of the papers contained in this book

Machine Learning and Data Mining Igor Kononenko, Matjaz

Kukar, 2007-04-30 Good data mining practice for business intelligence the art of turning raw software into meaningful information is demonstrated by the many new techniques and developments in the conversion of fresh scientific discovery into widely accessible software solutions Written as an introduction to the main issues associated with the basics of machine learning and the algorithms used in data mining this text is suitable for advanced undergraduates postgraduates and tutors in a wide area of computer science and technology as well as researchers looking to adapt various algorithms for particular data mining tasks A valuable addition to libraries and bookshelves of the many companies who are using the principles of data mining to effectively deliver solid business and industry solutions
