**Mathematical Elements for Computer Graphics** David F. Rogers, James Alan Adams, 1976 This text is ideal for junior senior and graduate level courses in computer graphics and computer aided design taught in departments of mechanical and aeronautical engineering and computer science It presents in a unified manner an introduction to the mathematical theory underlying computer graphic applications It covers topics of keen interest to students in engineering and computer science transformations projections 2 D and 3 D curve definition schemes and surface definitions It also includes techniques such as B splines which are incorporated as part of the software in advanced engineering workstations A basic knowledge of vector and matrix algebra and calculus is required

The NURBS Book Les Piegl, Wayne Tiller, 2012-12-06 Until recently B spline curves and surfaces NURBS were principally of interest to the computer aided design community where they have become the standard for curve and surface description Today we are seeing expanded use of NURBS in modeling objects for the visual arts including the film and entertainment industries art and sculpture NURBS are now also being used for modeling scenes for virtual reality applications These applications are expected to increase Consequently it is quite appropriate for The N U R BS Book to be part of the Monographs in Visual Communication Series B spline curves and surfaces have been an enduring element throughout my professional life The first edition of Mathematical Elements for Computer Graphics published in 1972 was the first computer aided design interactive computer graphics textbook to contain material on B splines That material was obtained through the good graces of Bill Gordon and Louie Knapp while they were at Syracuse University A paper of mine presented during the Summer of 1977 at a Society of Naval Architects and Marine Engineers meeting on computer aided ship surface design was arguably the first to examine the use of B spline curves for ship design For many B splines rational B splines and NURBS have been a bit mysterious
