Sustainability Challenges of Brazilian Agriculture Niels Søndergaard, Camila Dias de Sá, Ana Flávia

Barros-Plataiu, 2023-05-24 With contributions from a wide range of thematic areas this book provides a diverse perspective on the contemporary environmental challenges of Brazilian agriculture Assessing existing experiences of governance interventions implementation of inclusive and sustainable production practices as well as technical innovations this edited volume presents the reader with a nuanced perspective on sustainable future pathways for Brazilian agriculture In many cases actors within the agricultural sector stand in a key position to address environmental concerns which often has generated important breakthroughs and improvement of production practices Drawing on contributions from authors within a variety of fields this contribution presents a trans disciplinary perspective on the problems and pathways through which multi level interventions can lead to sustainable solutions within the Brazilian agricultural and livestock sector This book hereby constitutes an informed and timely contribution to the important debates about Brazil s potential role in confronting environmental problems More broadly this volume also sheds light on the process of agricultural transitions in the Global South and how food security concerns may be reconciled with sustainable production **Soy, Globalization, and**

Environmental Politics in South America Gustavo de L. T. Oliveira, Susanna B. Hecht, 2017-10-24 Soy in South America constitutes one of the most spectacular booms of agro industrial commodity production in the world It is the pinnacle of modernist agro industrial practices serving as a key nexus in food feed fuel production that underpins the agribusiness conservationist discourse of land sparing through intensification Yet soy production is implicated in multiple problems beyond deforestation ranging from pesticide drift and contamination to social exclusion and conflicts in frontier zones to concentration of wealth and income among the largest landowners and corporations This book explores in depth the complex dynamics of soy production from its diverse social settings to its transnational connections examining the politics of commodity and knowledge production the role of the state and the reach of corporate power in everyday life across soy landscapes in South America Ultimately the collection encourages us to search and struggle for agroecological alternatives through which we may overcome the pitfalls of this massive transnational capitalist agro industry This book was originally published as a special issue of The Journal of Peasant Studies **On The Edge** Claude Martin, 2015 The author brings together information from remote imaging ecology and economics to explain deforestation and forest health through the world Front jacket flap

Brazilian Agricultural Diplomacy in the 21st Century Niels Søndergaard, 2023-11-10 Brazil s growing dependence on agriculture has positioned agribusiness in a uniquely privileged position to influence Brazilian foreign policy Brazilian Agricultural Diplomacy in the 21st Century examines how the inclusion of domestic national champions in foreign policy has shaped events within key global governance arenas Starting with an explanation of the structural economic importance of agriculture within the Brazilian economy Niels Søndergaard tells the story of agribusiness

participation in foreign policy and how this Brazilian Agricultural Diplomacy has unfolded in recent decades Expanding on his extensive archival research undertaken in the Brazilian Ministry of Foreign Affairs and interviews with key figures S ndergaard analyzes decision making processes in multilateral trade negotiations WTO dispute settlement joint lobbying transnational multistakeholder governance bilateral interactions and within the agriculture climate nexus These case studies show how a clear convergence of interests close coordination resource pooling and coalition formation as part of this public private partnership has produced impactful results within the wider global governance landscape and how key goals of agricultural diplomacy have been internalized by actors in the foreign policymaking process Brazilian Agricultural Diplomacy in the 21st Century is suitable for scholars and researchers studying developing economies in global governance power transitions and multilateralism food and climate politics and domestic interests in foreign policy **Acta amazonica** ,2017

Environmental Organizations and Development

Luiz C. Barbosa,2015-05-08 The Amazon region is the focus of intense

conflict between conservationists concerned with deforestation and advocates of agro industrial development This book

focuses on the contributions of environmental organizations to the preservation of Brazilian Amazonia It reveals how

environmental organizations such as Greenpeace Friends of the Earth WWF and others have fought fiercely to stop

deforestation in the region It documents how the history of frontier expansion and environmental struggle in the region is

linked to Brazil s position in an evolving capitalist world economy It is shown how Brazil s effort to become a developed

country has led successive Brazilian governments to devise development projects for Amazonia The author analyses how

globalization has led to the expansion of international commodity chains in the region particularly for mineral ores soybeans

and beef He shows how environmental organizations have politicized these commodity chains as weapons of conservation

through boycotting certain products while other pro development groups within Brazil claim that such organizations threaten

Brazil s sovereignty over its own resources

The Soybean Through World History Matilda Baraibar Norberg,Lisa Deutsch,2023-06-30 This book examines the

changing roles and functions of the soybean throughout world history and discusses how this reflects the complex processes of agrofood globalization. The book uses a historical lens to analyze the processes and features that brought us to the current global configuration of the soybean commodity chain. From its origins as a peasant food in ancient China today the protein rich soybean is by far the most cultivated biotech crop on Earth used to make a huge variety of food and industrial products including animal feed, tofu, cooking oil, soy sauce, biodiesel, and soap. While there is a burgeoning amount of literature on how the contemporary global soy web affects large tracts of our planet's social ecological systems, little attention has been given to the questions of how we got here and what alternative roles the soybean has played in the past. This book fills this gap and demonstrates that it is impossible to properly comprehend the contemporary global soybean chain or the wider agrofood system of which it is a part without looking at both their long and short historical development. However, a history of the soybean and its changing roles within equally changing agrofood systems is inexorably a history about globalization. Not only does this book map out where soybeans are produced but also who governs, wields power, and accumulates capital in the entire commodity chain from inputs in production to consumption, as well as identifying the institutional context the global commodity chain operates within. The book concludes with a discussion of the main challenges and contradictions of the current soy regime that could trigger its rupture and end. This book is essential reading for students, practitioners, and scholars interested in agriculture and food systems, global commodity chains, globalization, environmental history, economic history, and social ecological systems.

The World of Soy Christine M. Du Bois, Chee-Beng Tan, Sidney Mintz, 2008-08-04 A lively discussion of soy production and consumption. *The Political Economy of Agricultural Booms* Mariano Turzi, 2016-11-15 This book offers an in depth analysis of the political economy of soybean production in Brazil, Argentina, and Paraguay by identifying the dominant private and public actors and control mechanisms that have given rise to a corporate driven, vertically integrated system of regionalized agricultural production in the Southern Cone of South America. The current agricultural boom surrounding soybean production has been aided by aggressive new agro technologies including biotechnology, leading to massive organizational changes in the agricultural sector and a significant rise in the power of special interest groups and corporations. Despite having similar initial production conditions, the pattern of economic activity surrounding soybean production in Brazil, Argentina, and Paraguay continues to be largely determined by the needs of the multinational corporations involved rather than national considerations of comparative advantage. The author uses these findings to argue that the new international model of agricultural production empowers chemical and trading multinational companies over national governments.

Exchange Rates, Soybean Supply Response, and Deforestation in South America Peter D. Richards, 2012 Looks at historical trends in soybean prices, exchange rates, and cropland dedicated to soybean production in Bolivia, Paraguay, and Brazil to estimate the impact of currency devaluations on area of production.

The Age of the Soybean Claiton Marcio Da Silva, Claudio de Majo, 2022-11-15 The soybean is far more than just a

versatile crop whose derivatives serve the protein needs of a meatless diet One of the world's most important commodities soy represents the embodiment of mechanised industrial agriculture and is one of the main actors behind the socioeconomic political and ecological transformations of industrial farming in several world regions Despite the crop's potential as a cheap source of vegetal protein for human consumers most industrial soybean production has fuelled the global meat industrial complex as animal feed Soybean is thus paradoxically still a relatively invisible crop to the public at large although its global yields continue to increase at stupendous rates lining the pockets of agribusiness and to the detriment of traditional agriculture The transnational socio ecological and economic entanglements characterising this versatile legume's global expansion have prompted scholarly attention as researchers around the world have begun to unveil the main historical drivers behind the rise of the soybean in the global food chain This book aims to expand the analysis offering the most significant effort so far at an environmental history of soybeans Interrogating the socioeconomic and ecological transformations determined by and determining the rise of soy in international food chains during the Great Acceleration the volume gathers contributions from an international cast of researchers working in numerous geographical contexts from Japan and China to India African nations the Southern Cone of Latin America Northern Europe and the United States Soybean farming breeding processing and marketing have bound together the histories of these diverse regions and altered beyond recognition their ecological and socio economic contexts

Soybeans and Power Pablo Lapegna, 2016 Although Argentina's use of genetically modified GM soybean seeds has spurred a major agricultural boom it has also had a negative impact on many communities In *Soybeans and Power* Pablo Lapegna explores the ways in which these communities have coped with GM soybean expansion Peasants initially resisted yet ultimately adapted to the new agricultural technologies playing an active role in their own demobilization in order to maneuver the situation to their advantage A rare glimpse into the life cycle of a social movement *Soybeans and Power* gives voice to the communities most adversely affected by GM technology and the strategies that they have enacted in order to survive

Beyond Deforestation Reductions Yannic Damm, Elías Cisneros, Jan Börner, 2022 Global commodity supply chains contribute significantly to environmental degradation and greenhouse gas emissions Improving supply chain transparency can create public awareness and incentivise relevant actors to improve their ecological footprint We exploited Brazil's blacklisting policy in the Amazon a public disclosure mechanism that effectively reduced deforestation rates since 2008 to study the behavioural response of land users and commodity traders to the corresponding reputational risk exposure Specifically we combined remotely sensed land use data with spatio temporally disaggregated soy trade statistics covering 15 years and 769 municipalities to measure the effect of blacklisting on land use change sourcing patterns and trade destinations We applied the Generalised Synthetic Control method to our panel data to find a drastic decrease in deforestation matched by a similarly sized reduction in pasture expansion At the same time soy expansion increased significantly but instead of expanding into natural forests it mostly

replaced existing pastures and other cropland The additional soy production was exported predominantly to China whereas exports to the EU stagnated Modern Soybean Production Walter O. Scott, Samuel R. Aldrich, 1983 **At the Edge of Paradise** George Toyoyoshi Kamide, 2005
