solutions recognizing that it is not always necessary to blindly pursue new tools

Written in unprecedented and turbulent times for conversational interfaces you'll see that despite previous waves of advancement in conversational technology now conversational interfaces are gaining unparalleled popularity

Specifically the release of ChatGPT in November 2022 by Open AI revolutionized the conversational paradigm and showed how easy and intuitive communication with a computer can be

Old professions are being disrupted new professions are emerging and even the most conservative corporations are changing their strategy and experimenting with large language models allocating an unprecedented amount of budget to these projects

No one knows for sure the exact future of conversational AI but everyone agrees that it's here to stay

What You'll Learn

See how large language models are constructed and used in conversational systems

Review the risks and challenges of new technologies in conversational AI

Examine techniques for prompt engineering

Enable practitioners to keep abreast of recent developments in conversational AI

Who This Book Is For

Conversation designers product owners and product or project managers in conversational AI who wish to learn about new methods and challenges posed by the recent emergence in the public domain of ChatGPT

Data scientists final year undergraduates and graduates of computer science

Digital Wisdom Richard Lachman, 2026-02-27

Inviting us to an active role in reshaping technology is at the core of Digital Wisdom

Searching for Agency in the Age of AI

The book helps you understand more about the underlying issues of AI social media and data analytics so we all can pick a better path together

This book explores how fundamental aspects of today's digital technology intersect with our rights and assumptions about private life individual autonomy and social boundaries

This exploration begins with a discussion about what all that data collected about us is for and how companies governments and ourselves as people who also work for those companies and governments might want to alter the dynamic

The book looks at our changing sense of privacy and how data is not just recorded but fused correlated shared and acted upon in ways that seem fundamentally different than our laws or principles once assumed

It talks about technology's role in making us seem to be more divided than ever affecting our politics our pastimes and even our basic ability to connect with one another

Examining ways in which technology is used to change our minds sometimes for our benefit and sometimes to our detriment

the book breaks down the increasing use of algorithms that impact our everyday lives so we can build a more ethical practice of digital technology

This exploration about our digital future invites us to instead build a practice of Digital Wisdom

It makes an argument for how we can use this wisdom to live more fully in the ways we want with the features of technological advancement we choose

It suggests how our educational systems industries and governments could shift to better support Digital Wisdom

These ideas are not exhaustive

Digital Wisdom is a mindset rather than a simple set of steps to follow

Applying this mindset is going to take creativity from all of us but in the end the Digital Wisdom mindset will guide us in taking concrete steps towards a more responsible digital future

Public Mental Health in Trauma and War Gülseren Keskin, Mahire Olcay Çam, Man Cheung Chung, 2025-02-06

People living in war zones are exposed to numerous stressors

including physical harm psychological trauma loss deprivation bereavement or abuse In recent years there has been growing acceptance that war related stressors have the potential to pose a risk to health Epidemiological studies also reveal the health consequences associated with war and trauma and agree that post traumatic stress disorder and depression are common in war affected populations Since the turn of the last century there have also been changes in the conception of war Nowadays wars have evolved into a new form that can affect larger masses instead of hand to hand combat with cannons and rifles War is an artificial disaster and differs from the kind of natural pandemic disaster that affects the whole world Countless deaths forced abandonment of homes families friends and property and severe anxiety about war are experienced because of the war related conditions for millions of humans
