"Friend or Foe? The west's great plan of world dominance" Tim I. Gurung, 2026-02-13 Colonisation may have begun in the fifteenth century and formally ended by the late twentieth but did it ever truly disappear or did it simply evolve Once defined by territorial conquest colonisation today operates through influence perception and the shaping of minds In the aftermath of two World Wars a weakened Europe ceded global leadership to the United States As a former colony and a modern republic the U S could not adopt the old imperial model Instead it pioneered a far more subtle and expansive strategy a multi layered multi institutional form of mental and cultural domination that reshaped the world order Across twenty incisive chapters this book traces how this new system was conceived implemented and ultimately succeeded transforming global power dynamics in less than eighty years It also confronts a critical question has the Western world acted as a friend or a foe to the rest of humanity Provocative sweeping and urgently relevant this book offers essential insight into the forces that continue to shape our world today
