**Ethics and Experiments** Scott Desposato, 2015-12-22 For most of political science's history discussions about professional ethics had nothing to do with human subjects Professional ethics involved integrity in the classroom fair tenure and promotion rule and the careful avoidance of plagiarism As most research was observational there was little need for attention to how scholarly activities might directly affect the subjects of our work Times have changed The dramatic growth in the use of experiments in social science especially overseas is generating unexpected ethical controversies The purpose of this volume is to identify debate and propose practical solutions to the most critical of these new ethical issues A leading team of internationally distinguished political science scholars presents the first examination of the practical and ethical challenges of research with human subjects in social science and policy studies Part 1 examines contextual challenges provided by experiments conducted overseas questions of culture religion security and poverty Part 2 examines questions of legal constraints on research focusing on questions of foreign review of international experiments Part 3 tackles the critical issues in field experiments including deception and consent impact on elections and careers the boundaries of the public officials exemption and the use of partner organizations to avoid Institutional Review Body IRB review Part 4 considers strategies for the future including training and education IRB reform institutional changes and norm development

Frontiers in Earth Science - Editor's Choice 2017 Valerio Acocella, 2018-03-29 2017 has been an exciting year for our innovative open access journal Frontiers in Earth Science many new articles have been published and are now indexed in Web of Science ESCI new sections have opened for submissions including Solid Earth Geophysics and our Editorial Board has been successfully leading the peer review process and providing comprehensive reviews to our authors Have a look at our archive to read about the feeding habits of dinosaurs human influence on in the African humid period volcanic hazard models or how glaciers flowing into the ocean surrounding Greenland have changed over time Launched at the end of 2013 our Journal consists of several specialties whose number has increased with time and currently stands at 19 also including a few specialties co listed in other fields <https://www.frontiersin.org/journals/earth-science> The present selection is not exhaustive as new ones are being launched and or are under consideration for development This growth has been paralleled by a yearly increase in the number of contributions and the Editorial Board members reflecting the health of the Journal Now also indexed in Web of Science Emerging Sources Citation Index ESCI Frontiers in Earth Science is ambitious to become the leading open access journal in its field The idea of creating an Editor's Choice eBook has been in our minds for a while as we wanted to create an environment for the Chief Editors to highlight their choice of representative papers in the Journal we are happy to present now our first edition The eBook offers a quick though representative window into the different specialties giving additional visibility to some of the most interesting studies published in 2016 and 2017 It provides a glimpse into the state of the art of Earth Science on the cusp of 2020 Earth Science studies the different spheres of the Earth geosphere

atmosphere hydrosphere and partly biosphere and as such it provides a holistic perspective of our planet This discipline in addition to understanding our environment enables us to face major natural challenges such as improving the management of natural resources promoting environmental sustainability and forecasting and managing natural hazards Acocella 2015 and references therein On this basis the contributions grouped in this eBook even though appearing distinct in subject methods goal and impact should be considered as different aspects of the same system Indeed the selection of these contributions aims to capture a multidisciplinary and common understanding of our planet with its interconnected processes and challenges It is important to note that in many cases it has not been easy to select a representative study per specialty and thus the papers included in this eBook should therefore not be considered as the representative ones but rather as a concise selection of key papers We hope you enjoy reading our first edition of the Editor s Choice eBook Jessica Journal Manager and Valerio Field Chief Editor
