Early Access Deals Deal Returns:

Turn One Purchase Into Many Alina Frost, 2026-02-25 Most businesses invest their greatest resources in acquisition and their least in what happens afterward The first purchase is celebrated as a conversion while the far more valuable question of what follows remains structurally unaddressed The gap between businesses that extract a single transaction and those that cultivate compounding customer relationships is not a marketing problem it is a design problem This book explores the dynamics behind customer lifetime value examining the patterns that distinguish transactional businesses from those that construct genuine retention ecosystems It reframes assumptions about loyalty repeat purchase behavior and backend revenue architecture revealing the underlying tensions between short term conversion focus and the long term relational structures that produce sustainable commercial outcomes Rather than prescribing promotional retention tactics this book examines how deliberate decisions around post purchase experience offer sequencing value delivery continuity and client relationship management interact to produce the conditions for compounding customer revenue It explores how lifetime value is constructed systematically not through discounts or loyalty programs alone but through the precise alignment of ongoing value delivery with evolving client needs Drawing on observable patterns across e commerce service businesses and entrepreneurial practice this book functions as a strategic lens for entrepreneurs and business operators who understand that the most underleveraged asset in most businesses is not the next new customer it is the one who already said yes
