Eastern Europe because their relative capital scarcity implies high rates of productivity for capital The most serious obstacle to private investment is uncertainty about the reform process which can potentially rule out all but the most profitable projects This problem sharply increases the payoff from accelerating the structural reform process Regarding savings critical aspects are the changes in methods of financing resulting from economic reform and the availability of foreign savings both in the form of loans and foreign direct investment Trade Liberalization, Stabilization, and Growth International Monetary Fund,1990-01-01 While inflation slowed sharply in Mexico during 1988 imports surged Although the growth of domestic absorption could be attributed to a higher fiscal deficit deriving from sharply higher domestic interest rates this paper argues that the recovery of private investment was the main driving force as the private sector saved most of its interest income on public debt The paper also analyzes some of the costs and benefits associated with trade liberalization While there is no evidence yet that trade liberalization contributed decisively to price stabilization it may have played an important role in stimulating exports and investment **MacUser** ,1995 **Kiplinger's Personal Finance** ,1998-01 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics *Savings Institutions* ,1988-05 Improving Financial Literacy in the United States United States. Personal Finance Bernard J. Winger,Ralph R. Frasca,2006 The treatment of vertical intra brand restraints is one of the most controversial issues of contemporary competition law and policy and there are substantial differences between the world s two leading regimes in this regard In the US resale price fixing merits an effects analysis while in the EU it is prohibited outright Likewise territorial protection is treated laxly in the US while in the EU absolute territorial protection due to the single market imperative is chased with fire and sword **European Financial Integration and Revenue from Seignorage** International Monetary Fund,1989-05-10 Financial integration is likely to entail EEC wide convergence in both inflation rates and bank reserve requirements thereby lowering some governments seignorage revenues These revenue losses however may be offset by concomitant effects on exchange rate expectations and on interest rates on publicly held government debt In Italy the high stock of such debt in relation to base money implies that to offset the loss of seignorage it will take only about a 1 2 percentage point decline in real interest rates A decline of this magnitude seems feasible provided that there is credible action to place the public debt on a sustainable path Data Communications ,1996 On Board
