Dr Lo c Pl is a Professor of Strategic Management and Director of Teaching and Learning at IESEG School of Management He has a Ph D in Management Sciences from University Paris Dauphine PSL He created I SEG Center for Educational and Technological Innovation CETI in 2009 promoting the use of technology to benefit teaching and learning

Dr Elliroma Gardiner is an Organisational Psychologist and Associate Professor at QUT Business School in Australia With over 18 years of experience teaching and researching across Australia Asia and Europe she has held academic positions at the London School of Economics I SEG School of Management and Griffith University

ICT for Intelligent Systems Jyoti Choudrie,Eva Tuba,Thinagaran Perumal,Amit Joshi,2026-01-01 This book gathers papers addressing state of the art research in all areas of information and communication technologies and their applications in intelligent computing cloud storage data mining and software analysis It presents the outcomes of the 10th International Conference on Information and Communication Technology for Intelligent Systems ICTIS 2025 held in New York USA The book discusses the fundamentals of various data analysis techniques and algorithms making it a valuable resource for researchers and practitioners alike

Build AI-Enhanced Web Apps Theo Despoudis,2026-03-17 This book shows you step by step and example by example how to build sites and applications that take advantage of large language models LLMs like GPT Claude and Llama Written especially for web developers comfortable with React or Next js this book introduces the tools and techniques you need to add sophisticated AI features like Retrieval Augmented Generation RAG document summarization chatbots and more to your web based projects It guides you through AI development using only JavaScript and other common web dev skills no Python or Machine Learning experience required You ll learn by working with full scale AI projects that solve actual business problems You ll soon be delivering user friendly efficient interfaces that make the absolute best use of AI tech In Build AI Enhanced Web Apps you ll learn how to Integrate AI models into React and Next js applications Implement streaming

responses and real time AI interactions Manage conversation history and context in chat applications Implement LangChain.js for complex AI workflows and reasoning Build a web application for summarizing documents using LangChain.js Utilize Retrieval Augmented Generation RAG systems for knowledge management Develop an AI powered interview preparation system with voice feedback About the technology The users have spoken Agents personalized responses and other LLM powered features are required in modern web applications Build AI Enhanced Web Apps presents the end to end architecture of AI web apps including UI backend infrastructure data processing API integration deployment and scaling with examples and language perfect for professional web developers About the book This accessible book shows you how to ship real AI features not just toy demos using a JavaScript stack you already know React for UI Next.js for backend integration and the Vercel AI SDK to connect to LLMs like Gemini and GPT In it you'll acquire the skills you need to complete two portfolio ready projects a voice based interview assistant and a RAG powered corporate knowledge system You'll also learn how to design workflows that balance latency cost and UX and implement responsible guardrails for security quality control hallucinations and bias What's inside Build AI features using a professional stack Ship production ready features Learn from concrete projects About the reader For web developers familiar with JavaScript and React About the author Theo Despoudis is a Senior Engineer at WP Engine specializing in AI powered search and headless WordPress He is an expert in integrating LLMs RAG and Vercel AI SDK into React and Next.js apps Table of Contents Part 1 1 Using generative AI in web apps 2 Building your first generative AI web application 3 Connecting AI models with the Vercel AI SDK 4 Managing conversation and state in your application Part 2 5 Prompt engineering in web applications 6 Building AI workflows with LangChain.js 7 Document summarization and RAG with LangChain.js 8 Testing and debugging techniques 9 Deployment and security Part 3 10 Building an AI interview assistant Project walk through 11 Building an AI RAG agent Project walk through Part 4 12 Integrating web apps with the Model Context Protocol A Running the examples Simulation Modeling and Analysis, Sixth Edition Averill M. Law, 2025-02-21 Comprehensive state of the art coverage of every important simulation technique This fully revised book has the most comprehensive and up to date coverage of all aspects of a simulation study Equally well suited for use in university courses simulation practice and self study the book offers clear and intuitive explanations as well as 300 figures 218 examples and 217 problems You will get detailed discussions on modeling and simulation simulation software model verification and validation input modeling random number and variate generation statistical design and analysis of simulation experiments experimental design simulation optimization agent based simulation machine learning and much more Authored by an operations research analyst and industrial engineer with more than 40 years of experience Simulation Modeling and Analysis is widely regarded as the bible of simulation and now has more than 178 000 copies in print and 23 700 citations This sixth edition has been streamlined with several chapters downsized to eliminate outdated simulation programs or statistical techniques that are rarely used in practice and are unnecessarily complicated Most

analyses of simulation output data can now be done using three simple and familiar statistical formulas or expressions A new chapter covers AI and machine learning and their application to simulation Covers what are arguably the three most innovative and popular simulation software packages AnyLogic FlexSim and Simio Includes a set of instructor s resources Has been used at universities such as University of California Berkeley Stanford Georgia Tech Michigan Cornell Purdue Virginia Tech Penn State Wisconsin Columbia Texas A M Washington and Johns Hopkins Written by a world class expert in the field and an experienced educator who has presented more than 550 simulation and statistics short courses in 20 countries

2 *The Last Invention The Impact Of Advanced Ai* Francisco Jербesson De Freitas Morais,2026-01-15 The Last Invention The Impact of Advanced Artificial Intelligence Humanity has always moved forward by creating tools But for the first time it has created something capable of thinking learning and deciding In The Last Invention readers are taken on a deep clear and forward looking exploration of the rise of advanced artificial intelligence and its irreversible consequences for civilization The book examines how AI has evolved from a simple technological tool into a global cognitive infrastructure transforming education labor economics governments art science and even the human mind itself With accessible language and strong technical rigor the work explores the historical evolution of artificial intelligence how neural networks and large language models truly function the rise of multimodal generative AI the direct impact of AI on the global economy professions and geopolitical power and the ethical social and human limits of this transformation Moving beyond both technological hype and dystopian fear the book presents a central argument the greatest risk of AI is not the machine itself but how humanity chooses to use it By addressing themes such as expanded cognition digital exclusion inclusive interfaces augmented humans and mental sovereignty the book reveals that AI can become either the greatest instrument of inclusion ever created or the most sophisticated mechanism of inequality in human history The Last Invention is

A Review of Recent Advancements in Deep Reinforcement Learning Artur Sahakjan,2018-08-02 Bachelor Thesis from the year 2018 in the subject Computer Science Commercial Information Technology grade 1 0 University of Duisburg Essen language English abstract Reinforcement learning is a learning problem in which an actor has to behave optimally in its environment Deep learning methods on the other hand are a subclass of representation learning which in turn focuses on extracting the necessary features for the task e g classification or detection As such they serve as powerful function approximators The combination of those two paradigm results in deep reinforcement learning This thesis gives an overview of the recent advancement in the field The results are divided into two broad research directions value based and policy based approaches This research shows several algorithms from those directions and how they perform Finally multiple open research questions are addressed and new research directions are proposed

Natural Language Processing in Action, Second Edition Hobson Lane, Maria Dyshel,2025-02-25 Develop your NLP skills from scratch with an open source toolbox of Python packages Transformers Hugging Face vector databases and your own Large Language Models Natural Language Processing in Action

Second Edition has helped thousands of data scientists build machines that understand human language. In this new and revised edition you will discover state of the art Natural Language Processing (NLP) models like BERT and HuggingFace transformers, popular open source frameworks for chatbots and more. You will create NLP tools that can detect fake news, filter spam, deliver exceptional search results, and even build truthfulness and reasoning into Large Language Models (LLMs). In Natural Language Processing in Action, Second Edition, you will learn how to process, analyze, understand, and generate natural language text. Build production quality NLP pipelines with spaCy. Build neural networks for NLP using PyTorch. BERT and GPT transformers for English composition, writing code, and even organizing your thoughts. Create chatbots and other conversational AI agents. In this new and revised edition you will discover state of the art NLP models like BERT and HuggingFace transformers, popular open source frameworks for chatbots and more. Plus you will discover vital skills and techniques for optimizing LLMs, including conversational design and automating the trial and error of LLM interactions for effective and accurate results.

About the technology: From nearly human chatbots to ultra personalized business reports to AI generated email, news stories, and novels, natural language processing (NLP) has never been more powerful. Groundbreaking advances in deep learning have made high quality open source models and powerful NLP tools like spaCy and PyTorch widely available and ready for production applications. This book is your entrance ticket and backstage pass into the next generation of natural language processing.

About the book: Natural Language Processing in Action, Second Edition introduces the foundational technologies and state of the art tools you will need to write and publish NLP applications. You learn how to create custom models for search, translation, writing assistants, and more, without relying on big commercial foundation models. This fully updated second edition includes coverage of BERT, Hugging Face transformers, fine tuning large language models, and more.

What's inside: NLP pipelines with spaCy, Neural networks with PyTorch, BERT and GPT transformers, Conversational design for chatbots.

About the reader: For intermediate Python programmers familiar with deep learning basics.

About the author: Hobson Lane is a data scientist and machine learning engineer with over twenty years of experience building autonomous systems and NLP pipelines. Maria Dyshel is a social entrepreneur and artificial intelligence expert and the CEO and cofounder of Tangible AI. Cole Howard and Hannes Max Hapke were co authors of the first edition.

Open AI in Flux

Emerald Lawson, 2023-11-22

In the ever evolving landscape of artificial intelligence, OpenAI stands as a beacon of innovation and progress. OPEN AI IN FLUX: NAVIGATING THE RECENT TIDES OF CHANGE offers an in depth exploration of the latest developments and transformations at OpenAI. This comprehensive guide takes you on a journey through the intricate workings of OpenAI, shedding light on its recent advancements, research breakthroughs, and the impact it has on the world of AI. The book delves into the organization's mission, its pioneering research in artificial general intelligence (AGI), and how it is shaping the future of AI. Whether you're an AI enthusiast, a researcher, or someone intrigued by the potential of AGI, this book provides a valuable insight into the dynamic world of OpenAI. It captures the essence of the organization's commitment to

ensuring AGI benefits all of humanity and offers a unique perspective on the transformative power of AI Discover the exciting world of OpenAI and navigate the tides of change in AI with this enlightening read Get your copy today and embark on an intellectual adventure into the heart of OpenAI

How did Stanford continue to foster growth in Silicon Valley during the early 2000s? ,2025-10-01 Pre University Paper from the year 2024 in the subject Business economics Miscellaneous grade 10 language English abstract This research paper examines the symbiotic relationship between Silicon Valley and Stanford University and its impact on the startup scene in the early 2000s San Francisco Bay Area Furthermore a historical analysis of Stanford and Silicon Valley focuses on the deepened relationship these two entities have set up Additionally many companies that originated in Silicon Valley and have changed the world will be recognized Lastly the motivations and future directions of the Valley and Stanford will be explained The rise of massive open online courses MOOCs by universities such as Harvard and MIT sends knowledge at no cost and might change the Valley for the time to come

The Human Use of Human Beings Norbert Wiener,2025-08-12 For the 75th anniversary a new edition of *The Human Use of Human Beings* the landmark book that delves into the relationship between humans and computers and presciently anticipates many contemporary dilemmas surrounding AI technology With a new introduction by Brian Christian author of the bestselling *Algorithms to Live By* and *The Alignment Problem* In 1950 mathematician philosopher Norbert Wiener ended this classic book on the place of machines in society with a warning We shall never receive the right answers to our questions unless we ask the right questions The hour is very late and the choice of good and evil knocks at our door Wiener the founder of the science of cybernetics the study of the relationship between computers and the human nervous system was widely mislabeled as an advocate for the automation of human life As *The Human Use for Human Beings* reveals his vision was much more complex and interesting and is more relevant in today's world of AI than anyone could have anticipated In his new introduction Brian Christian aptly calls Wiener the progenitor of contemporary AI safety discourse Wiener hoped that machines would release people from relentless and repetitive drudgery to achieve more creative pursuits yet he anticipated the danger of dehumanizing and displacement His pioneering views on the human machine relationship as a communicative process are only more crucial now as we carry in our pockets AI devices that we can literally speak to His prescient warnings illuminate our contemporary relationships with language art and even social media *The Human Use of Human Beings* examines the implications of cybernetics for education law language science technology as Wiener anticipates the enormous impact in effect a third industrial revolution that the computer has had on our lives

Deep Learning with JAX Grigory Sapunov,2024-12-03 Accelerate deep learning and other number intensive tasks with JAX Google's awesome high performance numerical computing library The JAX numerical computing library tackles the core performance challenges at the heart of deep learning and other scientific computing tasks By combining Google's Accelerated Linear Algebra platform XLA with a hyper optimized version of NumPy and a variety of other high performance features JAX delivers a huge

performance boost in low level computations and transformations In Deep Learning with JAX you will learn how to Use JAX for numerical calculations Build differentiable models with JAX primitives Run distributed and parallelized computations with JAX Use high level neural network libraries such as Flax Leverage libraries and modules from the JAX ecosystem Deep Learning with JAX is a hands on guide to using JAX for deep learning and other mathematically intensive applications Google Developer Expert Grigory Sapunov steadily builds your understanding of JAX s concepts The engaging examples introduce the fundamental concepts on which JAX relies and then show you how to apply them to real world tasks You ll learn how to use JAX s ecosystem of high level libraries and modules and also how to combine TensorFlow and PyTorch with JAX for data loading and deployment About the technology Google s JAX offers a fresh vision for deep learning This powerful library gives you fine control over low level processes like gradient calculations delivering fast and efficient model training and inference especially on large datasets JAX has transformed how research scientists approach deep learning Now boasting a robust ecosystem of tools and libraries JAX makes evolutionary computations federated learning and other performance sensitive tasks approachable for all types of applications About the book Deep Learning with JAX teaches you to build effective neural networks with JAX In this example rich book you ll discover how JAX s unique features help you tackle important deep learning performance challenges like distributing computations across a cluster of TPUs You ll put the library into action as you create an image classification tool an image filter application and other realistic projects The nicely annotated code listings demonstrate how JAX s functional programming mindset improves composability and parallelization What s inside Use JAX for numerical calculations Build differentiable models with JAX primitives Run distributed and parallelized computations with JAX Use high level neural network libraries such as Flax About the reader For intermediate Python programmers who are familiar with deep learning About the author Grigory Sapunov holds a Ph D in artificial intelligence and is a Google Developer Expert in Machine Learning The technical editor on this book was Nicholas McGreivy Table of Contents Part 1 1 When and why to use JAX 2 Your first program in JAX Part 2 3 Working with arrays 4 Calculating gradients 5 Compiling your code 6 Vectorizing your code 7 Parallelizing your computations 8 Using tensor sharding 9 Random numbers in JAX 10 Working with pytrees Part 3 11 Higher level neural network libraries 12 Other members of the JAX ecosystem A Installing JAX B Using Google Colab C Using Google Cloud TPUs D Experimental parallelization Managing and Using Information Systems Keri E. Pearlson,Carol S. Saunders,Dennis F. Galletta,2023-12-27 Provides the knowledge and insights necessary to contribute to the Information Systems decision making process Managing Using Information Systems A Strategic Approach delivers a solid knowledgebase of basic concepts to help MBA students and general business managers alike become informed competent participants in Information Systems IS decisions Now in its eighth edition this fully up to date textbook explains the fundamental principles and practices required to use and manage information while illustrating how information systems can create or obstruct opportunities and even propel digital transformations within a wide range of

organizations Drawing from their expertise in both academia and industry the authors discuss the business and design processes relevant to IS while presenting a basic framework that connects business strategy IS strategy and organizational strategy Step by step readers are guided through each essential aspect of Information Systems from fundamental information architecture and infrastructure to cyber security Artificial Intelligence AI business analytics project management platform and IS governance IS sourcing and more Detailed chapters contain mini cases full length case studies discussion topics review questions supplemental readings and topic specific managerial concerns that provide insights into real world IS issues Managing Using Information Systems A Strategic Approach Eighth Edition is an excellent textbook for advanced undergraduate and MBA level courses on IS concepts and managerial approaches to leveraging emerging information technologies
