**Business Model Innovation** Allan Afuah, 2018-10-03 Rooted in strategic management research, Business Model Innovation explores the concepts, tools, and techniques that enable organizations to gain and/or maintain a competitive advantage in the face of technological innovation, globalization, and an increasingly knowledge-intensive economy. Updated with all new cases, this second edition of the must-have for those looking to grasp the fundamentals of business model innovation explores the novel ways in which an organization can generate, deliver, and monetize benefits to customers.

The Four Competitive Business Drivers Jorge Sá, Magda Pereira, 2026-01-13 Sometimes management books achieve a clear-cut distinction between strategy and tactics. Seldom do they include the business model as a third competitiveness driver. And never so far has the theory of business been considered as a fourth required performance vector, different from all other three. However, organizational optimization requires all four: the why, where, what, and how. The theory of business, Drucker, is the why; the company makes sense. The reality assumptions, the organization is grounded upon. What it is paid for. The business model, Porter, is the what; the basic pillars of a firm's organization. How it transforms client satisfaction into value for itself. Strategy, Joffe, is the where; the choice of 1 geographical area, 2 industries, and 3 within them of segments. And tactics is the how, respecting to the nine functional areas from marketing (Kotler) to human resources to how to advertise, how to motivate, etc. Four inferences follow. All four drivers are necessary conditions, none sufficient. They interrelate, some impacting on others. They must fit, reinforcing each other, and they should be periodically reviewed under a sequence of steps. This is illustrated by the book's detailed examples of e.g. Nike, Dollar Shave Club, Spotify, SpaceX, Vend me, Sears, IBM, Apple Music, McDonald's, Marks & Spencer, Canva, SolarCity.

Farfetch etc The fundamental message is that neglect of any of the four drivers brings efficiency doing things right the Phronesis of Aristotle at the cost of lower effectiveness doing the right things the Chokhmah of Solomon With more and more resources producing less and less underperformance will follow
